Home Control

Curtain controller
Silent Gliss curtain control allows the remote opening and closing of existing curtains via the infrared or radio frequency motorised track. The track is neat and discreet and will work with all pleated and pelmeted curtains.

Appliance controller
The quad appliance controller enables users to activate Steeper environmental controls and other entertainment systems that require radio frequency control.

Automated multipoint locking system
Useful for those who find door handles and keys difficult to use. Multipoint locks provide extra security especially on UPVC doors and can be operated manually or remotely.

Door opener
Abloy door openers are high quality door operators that work with all doors. They can be operated by various means, including controllers with infrared technology, pressure pads, proximity readers and push-pads.

Light switches
Varilight light switches can be operated internally via infrared sensor, allowing users to take control of their interior room lighting, for maximum flexibility.

Window opener
Windows that are difficult to operate or are out of reach can be opened and closed easily and safely with infrared or radio frequency control. Window Master can be used for windows in the home or conservatory, giving control throughout your house.

Duocom room unit
Duocom is an intercom system that incorporates a hall telephone central unit, room unit with speaker and a door unit with speaker to offer enhanced security. Particularly suited to users with limited mobility, Duocom provides full control of entry points, without any need to move.

Floor stand
The transportable mounting facility is compatible with the entire range of environmental controls and input switches that Steeper provide. A desk top version is also available.

Pager
Pagers provide the user with easy access to a member of staff, family member or carer at the touch of a button. Small and discreet, pagers will sound an alert and the unit will vibrate.

Mains control socket
Mains control sockets allow all mains powered domestic appliances to be switched on and off remotely, via the controllable radio and infrared sockets. The sockets are extremely portable enabling users to switch on internal lighting before they enter a room.

evoassist
Working with the latest Apple technology, evoassist turns an iPhone, iPod touch or iPad into a universal environmental control device. Flexible and easy to use, evoassist integrates seamlessly with Steeper's comprehensive range of home automation systems.

Loud speaking telephone
GewaTel 200 is a loud speaking telephone with built-in infrared technology to allow users to make and receive telephone calls via a remote controller.

ACTIV 500
The ACTIV environmental control device is a simple to use unit combining both radio control and infrared in one package. The system can carry out numerous simultaneous functions for comprehensive home automation, including intercoms, door entry, phones, TV and DVD.

Steeper

Assistive Technology

Our philosophy is returning independence through technology; delivering the tools that create the turning points that empower people to take control of their environment and reduce their reliance on care.

Our Products

From touch screen through to input switches, our systems allow total control of everyday functions, such as opening a door, closing a window and answering the phone, providing additional comfort; security and independence for our users.

Our products also make it possible to control a full range of home media and entertainment equipment, providing maximum flexibility and convenience for everyday living - creating a turning point in our users' lives.

Our Services

Steeper's clever technology and caring engineers are the foundation of the company's 30 year established reputation, with successful installations across the UK and Ireland through the NHS and with private clients.

Accredited to ISO 9001 standards, Steeper are certified in the design and installation of environmental control systems. Our engineers are rigorously and continually trained in all our product offerings, ensuring that we have not only the largest team, but also the best.
