Easy to use switch and voice control for Apple devices

pererro+ by Steeper is a simple, compact, plug and play adapter that works effortlessly with any Apple appliance. It provides users with access to all features, without the need to touch the screen.

Easy to use

Simply use a switch to scan through the on screen options and select the desired function - it really is that easy.

Communication for everyone

Apple devices are the market leaders in mobile communication and we believe this technology should be available to everyone.

Message, call or FaceTime your friends, share that web page on social media, relax and read a book or combine with environmental control apps like evoassist for ultimate control.

Key features
