Steeper Support

Hallux Rigidus Insoles

Featuring a low-profile design, these insoles incorporate a firm first ray extension to help reduce pain associated with movement of the first metatarsophalangeal joint.

Available in Easy Fit (formerly Lady Support), and Standard Fit (formerly Man Support), which provides a larger metatarsal base.

Indications for Use

- Painful extension at the first metatarsophalangeal joint

Steeper Support

Easy Fit Insoles

Designed for patients where space in footwear is limited, these low-profile insoles feature integrated metatarsal domes, making them ideal for managing metatarsalgia and Morton's neuroma.

Replacing the previous Steeper Support insoles, the new Easy Fit model features a slightly firmer base for improved support while maintaining its slim profile.

Indications for Use

- Metatarsalgia
- Morton's Neuroma
- Mechanical Foot Pain
- Forefoot Pain
