

4Seal TFS and TFC Senso Liners

The 4Seal Senso above-knee liner TFS/TFC allows a secure connection between the residual limb and the prosthesis. An especially soft thread is woven into the matrix of the 4Seal Senso. This results in a pleasantly smooth surface inside the liner for the care of very sensitive residual limb skin.

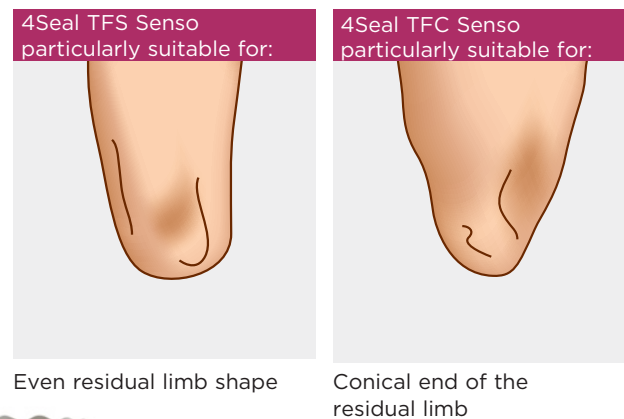

The silicone used is very stable, kind to skin and easy to clean. Due to four comfortable and flexible sealing fins, it is possible to provide a pleasant wearing comfort without constriction.

The liner can be turned inside out and put on without having to use any alcohol spray, providing more flexibility and independence.

Features and Benefits

Residual Limb Suitability

Technical Information

Material	Silicone
Matrix	Proprioceptive, continuous, internal
Length	Approx 40cm
Amputation Level	Transfemoral
Items Included	Instruction manual, drying stand
Warranty	6 months

Determining the size

- Determine the **circumferential dimension D (distal)** of the residual limb 4 cm above the distal end. The circumferential dimension minus 0-1 results in the Össur liner size. **Caution:** Bony structures (such as the edge of the femur) must be included in the circumferential dimension.
- Determine the residual limb length L, from the end (minus 4 cm) to the inseam height (perineum).
- Determine the **circumferential dimension P (proximal)** at the inseam height (perineum).*
- The residual limb length and circumference are the basis for selecting the correct version of the Össur liner (transfemoral, standard or conical).

*Explanation of the table: standard / conical
A standard liner (= S) applies if the proximal circumference P is below the reference value (<). A conical liner (= C) applies if the proximal circumference P is above the reference value (>).

Össur 4Seal Volume Management Sock

The Össur volume compensation stocking with integrated non-slip top band also features innovative EASY CUT technology. The stocking compensates for variations in volume and can easily be shortened to five different lengths without having to separate it, meaning no additional sewing is necessary.
