The AKOS liners are silicone interface liners specifically designed for all mobility classes of above-knee (transfemoral) amputees. The liner has a continuous matrix with minimal axial stretch to make it comfortable to wear and provides a high transverse stretch to ensure optimal soft tissue grip. The flexible fabric ensures an optimal fit at the distal end of the residual limb as well as ease of donning. The which restricts stretch this also eliminates the need for time-consuming sprays. Orientation marks on the liner help to ensure the liner is donned in the same position each time

CES OSS L16: Use this code to read the AKOS TFS and TFC Classic liners clinical evaluation summary on the Steeper website.

Features and Benefits

Residual Limb Suitability

Ordering Information

| Size | AKOS TFS <br> Part Number | AKOS TFC <br> Part Number |
| :--- | :--- | :--- |
| 24 cm | - | NM895624 |
| 27 cm | NM895527 | NM895627 |
| 31 cm | NM895531 | NM895631 |
| 35 cm | NM895535 | NM895635 |
| 39 cm | NM895539 | NM895639 |
| 43 cm | NM895543 | - |
| 47 cm | NM895547 | - |
| 52 cm | NM895552 | - |

Size Selection
Determining the size

1. Measure circumference $D$ (distal) of the residual limb 4 cm above the distal end of the residual limb. The determines the size to be ordered.
Attention: Bony structures (e.g. transfemoral border) must be included in the circumference. If the distal femur is not located within the above measurement,
measure higher than 4 cm above measure higher than 4 cm above
the distal end of the residual limb. The soft tissues must be tightly contained.
2. Measure the length of the residual limb length $L$ from the end of the residual limb $(-4 \mathrm{~cm})$ to the perineum.
3. Measure circumference $P$
(proximal) at the perineum.*
4. The residual limb length and circumference are the basis for choosing the correct version of the Össur Liner (transfemoral, standard or conical).

| 1 Distal Circ. D (Height 4cm) | $\begin{aligned} & 2 \text { Residual } \\ & \text { Limb Length } \\ & 10-15 \mathrm{~cm} \end{aligned}$ | $\begin{aligned} & 2 \text { Residual } \\ & \text { Limb Length } \\ & 15-20 \mathrm{~cm} \end{aligned}$ | $\begin{aligned} & 2 \text { Residual } \\ & \text { Limb Length } \\ & 20-25 \mathrm{~cm} \end{aligned}$ | $\begin{aligned} & 2 \text { Residual } \\ & \text { Limb Length } \\ & 25-30 \mathrm{~cm} \end{aligned}$ | $\begin{aligned} & 2 \text { Residual } \\ & \text { Limb Length } \\ & 30-35 \mathrm{~cm} \end{aligned}$ | 2 Residual Limb Length 35-40cm | Liner Size |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Technical Information

| Material | Silicone, transparent |
| :--- | :--- |
| Matrix | Proprioceptive, continuous, internal |
| Length | Approx 40cm |
| Amputation Level | Transfemoral |
| Distal Connector | Pin Adapter |
| Items Included | Silicone glue, Össur washing and <br> drying stand |

## 4

Notes on trimming

1. The matrix must not be cut.
2. The trim line for a
lower leg prosthesis should lie at least 10 cm
above the region of the socket edge.

3. Use the Össur pinking scissors for trimming
(Part No. N1950006).

[^0]:    Explanation of the table: standard, conical
    If the proximal circumference $P$ is above the standard figure ( $\langle( \rangle)$, it is is a satancoraral liner $(=C)$.
