

# Genu Sleeve

The Genu is a soft silicone suspension sleeve that is 3mm thick and designed for use with transtibial prostheses. It is gently tapered and, though not pre-flexed, the elasticated fabric outer cover has a more openly knitted section over the patella to allow easy knee flexion.

This high level of flexibility is achieved thanks to Össur's expertise in round-knit technology. As a consequence, even when flexed, the sleeve is virtually wrinkle-free, and the user has a lot of freedom of movement.

Though it was designed to be used with a suction system to provide an excellent level of suspension, it can also be used as a stand-alone suspension sleeve for patients who are less active, or require a sleeve that allows easier knee flexion.

The Genu Sleeve is supplied with a sleeve protector as standard, though these can also be purchased separately. They're made from a durable fabric, which helps prevent damage from the edge of the socket and thereby improve the longevity of the sleeve. Silicone pimples on the bottom edge of the sleeve keep it firmly in place on the socket.

## Features and Benefits

## ContexGel.protect

To avoid premature tearing of the Genu knee sleeves, we recommend using the ContexGel.protect as a protective cover for sharp-edged prosthetic sockets. This protective cover is made of durable and expandable fabric and has an inner silicone edge on the distal side to prevent slipping.
