

# Protect 3C Liner

The Protect 3C liner is a soft silicone liner that is particularly suitable for below knee (transtibial) amputees with reduced soft tissue coverage and/or poor skin condition up to mobility class 3. It contains a surgical grade oil and vitamin E which reduces adhesion, making the liner easier to apply and remove and may improve skin condition in as little as 3 days.

This liner's extra wall thickness provides excellent cushioning and comfort. The liner can be easily fitted and removed from the socket thanks to an outer textile cover that eliminates the need for time-consuming sprays.

**CES OSS L05:** Use this code to read the Protect 3C liner clinical evaluation summary on the Steeper website.

## Features and Benefits

## Residual Limb Suitability

Particularly suitable for:

Even residual limb shape, decreasing slightly distally, good soft tissue cover

Suitable for:

Residual limb bonier, rather poor soft tissue cover and/or with severe scars

More conical residual limb shape, good soft tissue cover

## Ordering Information

| Size   | Part Number |
|--------|-------------|
| 18cm   | NMC97118    |
| 20cm   | NMC97120    |
| 22cm   | NMC97122    |
| 23.5cm | NMC97123    |
| 25cm   | NMC97125    |
| 26.5cm | NMC97126    |
| 28cm   | NMC97128    |
| 30cm   | NMC97130    |
| 32cm   | NMC97132    |
| 34cm   | NMC97134    |
| 36cm   | NMC97136    |
| 38cm   | NMC97138    |
| 40cm   | NMC97140    |
| 42cm   | NMC97142    |
| 45cm   | NMC97145    |

## Size Selection

- Determining the size**
1. Measure the circumference of the residual limb 4cm above the distal end of the residual limb.
  2. Attention: Bony structures (e.g. end of the tibia) must be included in the circumference. If the distal tibia is not located within the above measurement, measure higher than 4cm above the distal end of the residual limb.
  3. The circumference minus 0-1 liner size determines the size to be ordered.

- Determining the matrix**
1. Measure the distance from the distal end of the residual limb to the head of the fibula.
  2. Attention: The matrix must not go above the head of the fibula.

- Notes on trimming**
1. The matrix must not be cut.
  2. The trim line for a lower leg prosthesis should lie at least 10cm above the region of the socket edge.
  3. Use the Össur pinking scissors for trimming (Part No. N1950006).

## Technical Information

|                  |   |
|------------------|---|
| Material         | Silicone gel, opaque                          |
| Matrix           | 2-zone matrix, internal 10+3cm                |
| Length           | Approx 35cm                                   |
| Amputation Level | Transtibial                                   |
| Distal Connector | Pin Adapter                                   |
| Items Included   | Silicone glue, Össur washing and drying stand |
| Warranty         | 6 months                                      |
