Lower Limb
Prosthetic Solutions
Our founder, Hugh Steeper, was a pioneer in the field of prosthetics; paving the way for innovations that would change the lives of Great War veterans. oday, the Steeper name continues to create positive turning points for patients and clinicians in need of ever more inventive prosthetic solutions.

Partnerships with world-class manufacturers
To provide complete coverage across our prosthetic product portfolio and o offer clinical independence to clinicians and patients, we partner with hand-picked selection of world-renowned manufacturers to bring the world's best lower limb prostheses to the UK.
Before we introduce them to the UK market, each product in our portfolio is evaluated by the Steeper Clinical Support Group with clinicians and patients. To read the evaluations for these products please visit our website.

## Catalogue guide

Using this catalogue, you will notice some differences in ordering methods and mobility classes due to the breadth of our suppliers. These are outlined on each product page, however, if you have any questions, please contact our friendly Customer Services team

Waterproof Products
The blue water symbol indicates that a product or component is waterproof, has water resistant fasteners and is suitable for occasiona submersion in water. Please observe any product-specific caveats. Always rinse immediately with fresh water and dry following exposure oo salt water or chlorinated water.

Water Resistant Products
The orange water symbol indicates that a product or component is water resistant with water resistant fasteners, making them suitable for use when there is the possibility of occasional contact with water. product-specific caveats. Always rinse immediately with fresh water and dry following exposure to salt water or chlorinated water.

2 Sidekicks are the first prosthetic feet designed specifically for use with foreshortened prostheses. Stride Control ${ }^{T M}$ adjustment and replaceable bumpers allow dorsiflexion and plantarflexion in real-world environments, offering the ultimate in balance and stability for those with bilateral transfemoral amputation.
Sidekicks mimic anatomical ankle motion, allowing movement to occur naturally whilst reducing socket interface forces and eliminating unwanted torque. They're also gait-matched and approved for use in wet conditions.

CES CPI F12: Use this code to read the Sidekicks clinical evaluation summary on the Steeper website.
 *Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits
Moulded tread is adhered to the foot with a molecular bond to maximise longevity
Additional customisation possible through the use of Stride Control ${ }^{T M}$ and replaceable bumpers slexible platform Supported anatomical ankle mo Waterproof*

Mimics anatomical ankle rotation

## Celsus ${ }^{\circledR}$

This light-weight and compliant foot has been designed for users with low to moderate levels of impact.
This foot has a low profile, similar to the Trés and Tribute feet. It also has built-in springs for and Tribute feet. It also has built-in springs for a smooth roll over and added security for users, especian Tribute and Trés, making it ideal for those patients who need a foot that protects them from excessive socket interface forces whilst also improving stability.

This durable yet lightweight foot is packaged within a low maintenance design, complete with a removable foot shell.

CES CPI F09: Use this code to read the Celsu clinical evaluation summary on the Steeper website.

Features and Benefits
Integrated spring system and Intelliweaves technology provides excellent multiaxial movement with a natural provides excellent multiaxial movement with a natural
centre of rotation; providing ground compliance and increased stability

- Low profile

Removable foot shell with sandal toe
Custom gait matching with pre-installed heel wedge and fulcrum pad to allow precise levels of resistance for maximum comfort

The Tribute foot offers a cost-effective option that provides stable footing and dependable performance on a variety of terrain, making it ideal for low to moderate impact individuals. Precisely gait matched, the multi-axial design and full-length toe lever provide the user with improved control and stability.

The Tribute provides anatomical plantar flexion, dorsiflexion, transverse rotation, and inversion/ eversion through true multi-axial movement in all three planes, allowing for ease of movement excellent ground compliance, and comfort

Stride Control ${ }^{\text {TM }}$ allows optional customisation of the plantar flexion/dorsiflexion characteristics with a simple adjustment of the posterior bumper.

CES CPI F02: Use this code to read the Tribute clinical evaluation summary on the Steeper website.

Features and Benefits

- Tri-axial technology to adapt to uneven terrain
- Full range of motion whilst maintaining ground contact

Adjustable Stride Control ${ }^{\text {TM }}$
Removable foot shell
Easy assembly and disassembly with one pin

Note: Please see the following page for Tribute spare parts ordering information.

The intuitive Trustep foot is designed to provide a combination of the vertical motion, rotation and stability associated with the anatomical foot. Throughout the gait cycle, the bumpers compress to bring the toe and heel down at the appropriate times, allowing the foot footing.

The unique split-keel design that defines the Trustep provides up to 15 mm of independent toe dorsiflexion during normal use. With a full range of options available, Trustep's versatile design allows for complete customisation, resulting in a natural gait pattern and unsurpassed comfort.

CES CPI F03: Use this code to read the Trustep clinical evaluation summary on the Steeper website.

Features and Benefits absorption reinforcement

Cosmetics

- Tri-axial technology to adapt to uneven terrain
- Bumpers compress the toe and heel at appropriate times whilst providing cushioning and impact
- Customisable bumpers for optimal control

The Venture foot has a full-length toe lever for a more dynamic response for active users.
Its two-stage response enables the dorsiflexion bumper to compress providing comfort during walking; this compression is controlled to foot's response to high-impact activities. Th heel bumper can be fire-tuned to achieve the heel bumper can be fine-tuned to achieve the ideal heel strike compression.

Designed for a demanding lifestyle, whether being used in the gym or the office, the precise engineering of the Venture generates a dynamic performance without sacrificing comfort.

Features and Benefits
Tri-axial technology easily adapts to any terrain Energy storing to reduce fatigue Adjustable Stride ControlTM - using 4 mm hex key to on Smooth transition from high to low activities

The Odyssey K2 enables the user to walk comfortably and negotiate everyday obstacle such as stairs, curbs and uneven surfaces.
A unique, curved hydraulic cylinder allows independent adjustment of plantar flexion and dorsiflexion via easily accessible dual Stride dorsiflexion via easily accessible dual Stride
Control ${ }^{\text {TM }}$ dials. The hydraulic ankle, which works in tandem with the Intelliweave keel, improves the user's posture, knee stability, and comfort, especially when negotiating slopes.

www.steepergroup.com

Features and Benefits

- Low profile hydraulic foot/ankle combination Hydraulic ankle increases ground contact throughout stance, enhancing knee stability while acting to reduce socket interface forces
Intelliweave ${ }^{\circ}$ composite foot base provides controlled energy return and a flexible heel
Easily accessible, independently adjustable hydraulic valves for tuning in clinic

Customisable Stride Control ${ }^{\circ}$

The Odyssey K3 utilises the patented curved hydraulic ankle as well as a higher frequency carbon fibre foot base for increased dynamic response. The angular positioning and robust ankle housing are specifically designed to support moderate activity users who change terrain and speed regularly.

The combination of smooth hydraulics and a dynamic foot base increases ground contact, dynamic foot base increases ground cont and enhances knee stability. The Odyssey and enhances knee stability. The Odyssey activities, including city walking and multiterrain hiking

Features and Benefits
Low-profile, curved hydraulic ankle
Robust ankle housing combined with a carbon composite keel and angular positioning designed for moderate impact users
Easily accessible, independently adjustable hydraulic valves for tuning in clinic
$2^{\circ}$ of smooth hydraulic motion ( $3^{\circ}$ dorsiflexion, $9^{\circ}$ plantarflexion)

The Accent IP allows users to adjust the hee height up to 5 cm with a simple push of a button, giving them complete control over their footwear choices in a low-maintenance package.
A cosmetically appealing foot, the Accent IP is provided with a contoured, soft ankle fairing provided with a contoured, soft ankle fairing buckling when the foot is adjusted at various heights.

This version includes an integrated pyramid for a quick and easy connection to standard 30 mm pylon pyramid systems. The Accent's balance of dynamic response and compliance make it a great choice for a vast array of low to moderate intensity activities.

CES CPI FO4: Use this code to read the Accent IP clinical evaluation summary on the Steeper website.

Features and Benefits
User adjustable hee height with up to 5 cm range and 13 increments of adjustment
Easy to operate height adiustment button located in the ankle, available in a choice of 2 locations - medial or lateral
Ankle fairing provides superior cosmetic finishing Suitable for a range of shoe styles

## Cosmetics

The Accent IP's bonded sandal toe foot shell is reinforced with Impact Dispersion Technology. The Ankle Fairing interlocks with the foot shell and conforms to both Endo
and dynamic pylons. The foot shell and ankle fairing are atomically designed for use with a skin to produce a natural finish.

Feet - PROTEOR - Freedom Pacifica LP

The Pacifica LP offers proven performance in an ultra-low profile design, which requires less than 50 mm of clearance for most commonly used sizes. The split-keel design provides stability-enhancing inversion and eversion as well as being lightweight and durable.

## Water-resistant

( $\because$
*Water-resistant: Safe for contact with water and water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Ultra low build height
- Integral male pyramid
- Split keel design

Foot lies within the foot shell to improve cosmetic finishing

- Available in 9 stiffness categories

Cosmetics

Ordering Information
Trial Period - This foot has a 30 day trial period on sizes 23-30 and categories 2-8 only.

Impact Level Descriptions
Low: Daily activities include mostly level ground walking moving around in the home and the community.
Moderate: Daily activities include up to unlimited walking,
climbing stairs and occasional moderate lifting (this does not include running).

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.
Note: Although the 'high' impact level states 'running' as an appropriate activity, the Pacifica $L P$ is not ideal for running.

29-31

Engineered for active amputees who require a lower build height foot, the Highlander foot provides a smooth gait and excellent energy return. The split-keel provides stability on uneven terrain by enhancing inversion and eversion. Many transfemoral amputees prefer this foot because of its ideal balance of stability and dynamic response.

## Water-resistant

 — $\qquad$Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Low build height with integral male pyramid
- Split keel design for excellent inversion/eversion
- Weight limit 166 kg

Available in 9 stiffness categories

The Agilix ${ }^{\text {TM }}$ is a multi-axial, shock-absorbing flexible foot system designed to manage loading impacts, reduce socket shear forces and improve comfort while walking on uneven terrain. The ultra-lightweight design offers K3 ambulators comfortable performance

## Water-resistant*

(
$\because$
*Water-resistant: Safe for contact with water and
occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits
Vertical shock absorption and carbon fibre flexibility optimised for low to moderate impact K3 ambulators; reduces socket shear forces and mproves overall comfort
Split keel design for increased durability
Multi-axial function increases ground compliance and stability
Full-length dynamic heel attached at the toe ensures a seamless roll-over, for superior comfort and a more symmetrical gait
The low profile and lightweight design of the Agilix allows users to do more and feel less tired at the end of the day

Ideal for active users, the Sierra foot ensures a smoother gait without the energy loss typically associated with other shock absorbing systems. Its unique angle-top design increase the length of the carbon fibre spring, which maximises energy return and flexibility. The split-keel provides excellent with allowing amputees to walk with confidence on uneven terrain.

CES FRE FO2: Use this code to read the Sierra clinical evaluation summary on the Steeper website.

The carbon fibre DynAdapt foot is easy to fit and cover with a cosmesis thanks to its slim profile and anatomical design. The full-length split keel provides a smooth, uninterrupted
roll-over from heel-strike to toe-off, as well roll-over from heel-strike to toe-off, as well as the medial/lateral compliance needed for good stability on uneven terrain. The advanced elivers a high cycle fatigue in a design that also gives a high energy return.

CES FRE FO7: Use this code to read the DynAdapt clinical evaluation summary on the Steeper website.

## Water-resistant*

Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly
salt or chlorinated.

Features and Benefits
Slim profile, carbon fibre foot system with a slender, anatomical design
Multi-axial function for maximum comfort
Full length split keel gives an uninterrupted rollover with good compliance and a dynamic respons through to toe-off
EnduraCore Technology delivers up to 3 times the ard laminate
Available in 9 stiffness categories

Feet - PROTEOR - Freedom Kinterra 3.0

The next edition from the well-proven hydraulic ankle that consistently sets higher standards for reliability, comfort and stability. The Kinterra 3.0 Foot/Ankle System combines carbon fibre and hydraulic technlogies to enhance the walking gait for low to moderat impact K3 ambulators, ensuring imp landscapes.

The Kinterra 3.0 model has a $20 \%$ increase in user weight rating compared to the previous 2.0 model. Now able to accommodate to patient weights up to 150 kg , without compromising any product unit weight increase.

The hydraulic ankle has $2^{\circ}$ of dorsiflexion agains a sprung bumper and $15^{\circ}$ of planterflexion and subsequent dorsiflexion. The rate of yield of these can be adjusted individually to achieve the most effective and comfortable gait for the user when descending a slope and the carbon fibre keel provides a smoother transition when ascending a slope. This device works well when used with microprocessor knees.
Water-resistant*
*Water-resistant: Safe for contact with water and

Feet - Trulife - Seattle Kinetic Light

The Kinetic Light foot has a slightly higher build height than the standard Kinetic and includes a standard, easy-to-access male pyramid adapter This foot also has a full-length, flexible keel.

Aimed at the moderate K2 activity user, this multi-axial foot can be set up with different ankle bumpers to suit the user's individual requirements, allowing for a soft heel strike rapid progression to foot-flat and controlled progression to toe-off.

This makes it ideal for both transfemoral and transibial applications, as well as a weight range of 60 kg to 160 kg .

CES SEA F03: Use this code to read the Kinetic range clinical evaluation summary on the Steeper website

*Water-resistant: Safe for contact with water and
occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits
. Multi-axial ankle within the foot shell

- Five exchangeable bumper options through the foo shell using the Kinetic tooling kit
- Excellent foot inversion/eversion and plantar flexion
- Full-length flexible keel
- Integral sandal toe cosmesis in two colour options
- Integral male pyramid

The Kinetic Edge has a lively keel and is ideal for patients on the edge of advancing to a K3 product. This low profile composite keel foot incorporates a conventional male pyramid adapter and has a removable foot shell.

This multi-axial foot, designed for moderate K2 activity users, can be set up with different ankle bumpers to suit user's individual requirements, allowing for a soft heel strike, rapid progression to foot-flat and controlled progression to toeoff.

Ideal for both transfemoral and transibial applications, as well as a wide weight range of under 60kg to 160kg.

CES SEA FO3: Use this code to read the Kinetic range clinical evaluation summary on the Steeper website

Water-resistant* $\qquad$
$\square$ $\because$
*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh salt or chlorinated.

Features and Benefits

- All the benefits of the Kinetic Light with the addition of a removable, sandal toe foot shell and a more lively keel
- Low profile composite keel with multi-axial ankle Ideal for patients on the edge of advancing to a K3 produ

The Solas foot unifies the benefits of the S-shaped carbon fibre systems from Trulife, the Solas provides shock absorption, torsional rotation and controlled but fast plantar flexion, making it ideal for medium to high activity users and particularly good for use on transfemoral prostheses.
The energy stored allows a smooth transition to foot-flat, which is stable thanks to the split keel, and with a good dynamic response, the keel, and with a good dynamic response, the smooth. It is also surprisingly light for a foot with such a wide range of capabilities.

Features and Benefits

- Smooth rollover and controlled plantar flexion
- Dynamic full length composite keel, split for Dynamic full length composite keel, spit for
compliance and stability on uneven surfaces
- Dynamic response

Optional toe wedges are provided to increase dorsiflexion resistance and mid-stance stability Flexible shank provides axial rotation and multiaxial articulation

Category Selection
To optimise the selection and ensure amputee's safety, follow the steps below to determine the appropriate keel
. Locate the column that corresponds with the amputee's impact level.
Within the selected column, locate the amputee's
weight.
3. Select the relevant foot length.
4. Place the relevant number into the part number for Place the re
ordering.

Note: If the amputee has a long BK , carries heavy loads or will reach a higher impact level within a year, choose the next category higher.

| Category Selection |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Cat. | Foot letioth <br> $(\mathrm{cm})$ | Low | Medium | High |
| 4 | $26-30$ | $137-160 \mathrm{~kg}$ | $124-145 \mathrm{~kg}$ | $106-125 \mathrm{~kg}$ |
| 3 | $24-30$ | $101-136 \mathrm{~kg}$ | $89-123 \mathrm{~kg}$ | $76-105 \mathrm{~kg}$ |
| 2 | $23-29$ | $81-100 \mathrm{~kg}$ | $71-88 \mathrm{~kg}$ | $61-75 \mathrm{~kg}$ |
| 1 | $22-28$ | $<80 \mathrm{~kg}$ | $<70 \mathrm{~kg}$ | $<60 \mathrm{~kg}$ |

With its excellent energy return and $+/-17$ degrees of Inversion and Eversion，the new Xtend Foot features characteristics comparable to a human foot．Constructed from tough glass fibre，carbon fibre and titanium this foot is ideal for all moderate－high activities including hiking， boating and golfing．

This foot provides a comfortable，natural walking style，even in challenging terrains like downward slopes and stairs．Suitable for users with above or below knee amputation and accommodates patients up to 150 kg ．

Features and Benefits
Adapts to uneven surfaces through its lightweight， flexible structure
$+/-17^{\circ}$ of inversion and eversion
Enables a more natural gait on slopes and inclines
Strong and effective energy return in every step
150kg weight limit
3 year warranty（foot shell－ 6 months）
30 day trial period

The Freedom QUATTRO Microprocessor Knee by PROTEOR is designed to allow users to live their lives with no boundaries. The latest innovation in MPK's, PROTEOR have introduced Hyper Active Real Time (H.A.R.T.) Control Technology which allows for fast and continua adjustments to the control valve diamete custom gait experience

Waterproof* water, rinse immediately with fresh water and dry.

Features and Benefits
Patented Hyper Active Real Time (H.A.R.T.) Control Technology provides a unique personal experience that tracks users individual gait patterns.
An intuitive stance lock is active within a range from
$0-70^{\circ}$, offering additional security, comfort and O-7ne
control
Advanced stumble recovery which determines the appropriate resistance to recover from a stumble more naturally
The power-off flexion resistance can be manually adjusted to accommodate different user preference and weights
Prosthetists will find set up simple using the Gait Lab app to set user parameters and modes. The app measure reporting giving clinicians an in-depth look measure reporting giving clinicia
of the users QUATTRO journey

The Freedom Innovations app allows users to adjust and customise 20 modes to suit their lifestyle Independent adjustable flexion and extension resistances and ROM/locking making sure the user has full control at all times
Functionality is integrated into the on-board keypad allowing users to check battery status, manually
switch activity modes or set and release flexion IP67 rating allows users to fully submerge under 1 P67 rating allows users to fully subm ander meter of water for up to 30 minutes
QUATTRO allows for seamless transitioning between activites
Lowest MPK build height for added versatility in foot selection
Field replaceable knee pad cover allowing for rapid replacement and uninterrupted use

5 years $\quad \downarrow$
Minimal servicing is required for QUATTRO, with no servicing needed until 36 months.
For further warranty and servicing information please contact customer services.

To establish a more natural experience of mobility, the Freedom Innovations team at PROTEOR examined biological norms and developed the Plié 3 knee with a microprocessor controlled swing and stance.

The Plié 3 is the most responsive MPC knee ever developed, thanks to its combination of high-performance processing capabilities and a cutting-edge hydraulic system.

water, rinse immediately with fresh water and dry

Features and Benefits
Independent adjustment of flexion, extension and stance yield
Sampling at 1000 Hz with a spool valve response
time of 10 milliseconds, the Plié 3 rasponds 10 to lime of 10 milliseconds, the Plie 3 responds 10 to 20
times more rapidly than other MPC knees Unique design controls both stance and swing phases, and the transition between them Rapid gait response through the combination of the hydraulic control and the microprocessor control logic, allowing the knee to react much faster than other MPC knees
Advanced, customisable stumble recovery
Cadence report to assist with outcome measures
Selection of 10 designer fairings
Transferable settings - save and reinstall settings into Transferable settings - save and reinstall settings
another unit e.g. when refitting after servicing
Water and particle-proof to IP67*
Plié 3 Packages
Plié 3 package includes a 5 year warranty, choice of one foot (Kinterra, Sierra, Highlander, Agilix, Pacifica LP or DynAdapt), a set of adapters and a preferred designe
fairing.

## Designer Fairings

Clinical Application
The Plie 3 is suitable for any K3 transfemoral prosthesis user who has adequate hip flexion and extension strength benefit from a unit that provide

A high degree of safety, by means of a stumble
recovery system recovery system
A customisable re
A customisable recovery system that will maintain safety over a range of activities
surfaces such as sand, pebbles and through over surfaces such as sand, pebbles and through grass
Protection from dust, sit, powder and moisture Protection from dust, silt, powder and moisture,
either in the work place or when pursuing a leisure activity

- Continuous function even when occasionally totally submersed
The ability to walk backwards, or traverse sideways For high K3 or K4 users, the opportunity to jog, or particicatei in a sport where change of pace or
direction is required

Please see the order form overleaf for further information on impact levels for compatible feet.

| Mechanical | NOFMO | Approx. 1km/h | 125 kg | 1 |
|  | NOFM2 | Approx. 2km/h | 125kg | 1,2 |
|  | NOFM1 / KFM1 | Approx. $3 \mathrm{~km} / \mathrm{h}$ | 136kg | 1,2 |
| Pneumatic | NOP2 | Approx. $4 \mathrm{~km} / \mathrm{h}$ | 125 kg | 2, (3) |
|  | NOP4 | Approx. $4 \mathrm{~km} / \mathrm{h}$ | 100kg | 2, (3) |
|  | NOP5 / NKP5 | Approx. $4 \mathrm{~km} / \mathrm{h}$ | 125kg | 2, (3) |
|  | NOHP3 | Approx. $4 \mathrm{~km} / \mathrm{h}$ | 125kg | (2), 3 |
|  | NOPASO/NKPASO | Auto adaptive - $2-7 \mathrm{~km} / \mathrm{h}^{*}$ | 136kg | (2) 3,4 |

*If the patient is capable of achieving above $7 \mathrm{~km} / \mathrm{h}$, the knee is capable of allowing them to do so, but it is the
responsibility of the prosthetist to ensure that the patient is safe to do so.
Part Number Descriptions
The names of the Össur knee joints are explained as follows:
Steeper add an $N$ prefix to the Össur number, to create a product code unique to them.

| The second letter describes the <br> amputation level, e.g.: | The third letter describes the <br> function, e.g.: | The number for the version <br> number, e.g.: |
| :--- | :--- | :--- |
| NOP4 = Transfemoral (pyramid <br> adapter) | NOFM1 $=$ Mechanical and locking | NOP4 $=$ Pneumatic above knee (O) <br> joint version 4 |
|  | NOP4 $=$ Pneumatic |  |

Mobility Classes 1 to 4
1 Indoor walkers
The patient has the ability or the potential to use a prosthesis to move from place to place or to walk at a
low speed on a flat surface low speed on a flat surface．The walking time and walking
distance are both strictly limited by their condition．
Treatment objective：
the patient＇s ability to stand and enable them to walk around in the home．

$$
\|-ー-ー \rightarrow \text { * }
$$

2 Restricted outdoor walkers
The patient has the ability or the potential to walk at low such as kerbs，single steps or uneven ground．
The walking time and the walking distance are both limited by their condition
Treatment objective：
To restore the patient＇s ability to stand and enable them to walk around in the home and the immediate vicinity．

$$
1 \text {-ーーーー }
$$

3 Unrestricted outdoor walkers
The patient has the ability or the potential to use a prosthesis to walk at moderate to high and also variable speeds，and to overcome most obstacles．He／She is also able to move around on open ground and can carry out occupational，therapeutic and other activities that do no The user may have an additional need for safety due The user may have an additional need for safety due to
secondary circumstances（addditional handicap，special siving conditions）in connection with moderate to high mobility demands．The walking time and the walking distance are both marginally limited compared with healthy individuals．
Treatment objective：
To restore the patient＇s ability to stand and enable them to walk around unhindered at home and，with minor restrictions only，outside．

$$
\overrightarrow{H-ー ー ー か ~}
$$

4
Unrestricted outdoor walkers with
particularly high demands
The patient has the ability or potential to use a prosthesis for walking as well as the unrestricted outside walker．In addition，high impact stresses may occur，for example， walking distance are both unlimited．
Treatment objective：
To restore the patient＇s ability to stand and enable them to walk around unhindered at home and with unlimited walking and mobility outside．

$$
\text { in' }^{0}\left|{ }^{1}\right| \underbrace{2} \underbrace{4} \longrightarrow \boldsymbol{K}
$$

Maximum Body Weight
In addition to the mobility classes，we will also define
 bearing load．
Please note：The product with the lowest given weight class determines the maximum permissible body weight．

[^1]The Össur NOFM2 is a small, lightweight monocentric unit that can be used as a free knee with weight-activated stance stability, but also comes complete with a lock mechanism and thigh release, making it a very versatile unit.
In position 1, the knee will lock automatically when extended. For position 2, lifting the lever up to the first stop position unlocks the knee, then upon release, the knee will automatically lock again on extension

CES OSS KO2: Use this code to read the NOFM2 clinical evaluation summary on the Steeper website.

Features and Benefits

- Compact and lightweight

Monocentric construction with finely adjustable Monocentric construction with finely adjustable
stance stability brake to suit the patient's weight o
to match the patient's gait
Angular alignment adjustment
Smooth transition into swing phase, with integrated extension spring adjustable to suit individual requirements
Easily converted to SAKL or HOKL with positive locking action
Unique, dual-function lock lever
 spring: The integrated
extension assist spring is adjustable to suit individual requirements.

Dual fun

Position 1: Knee locked position, the knee will lock auton
extended.

Position 2: Knee unlocked. Lifting the lever up to the first stop position will unlock the knee, then on releasing the lever the
knee will automatically lock again on extension. Lifting the lever so that it clicks past the first stop position will hold the knee
in an unlocked position, until the patient chooses to click it down again. It will extension.

The Össur NOFM1 is a small polycentric unit with a lock mechanism and thigh release that can be used as a free knee with geometric stance stability. The versatile NOFM1 is supplied with a male pyramid adapter to allow angular adjustment and the NKFM1 comes with a laminating adapter, complete with adjustable alignment discs, making it ideal for users with very long residual limbs.

CES OSS K01: Use this code to read the NOFM1/NKFM1 clinical evaluation summary on the Steeper website.

Features and Benefits

- Compact and lightweight

Polycentric construction provides improved ground
clearance in swing clearance in swing phase
Integrated extension assist
Easily converted to SAKL or HOKL with positive
locking action locking action
Unlimited rotation and 5 mm of shift in any direction are possible with either version, as is $10^{\circ}$ of angular adjustment, this being achieved on the NKFM1 by
means of a pair of wedge shaped rotatable discs means of a pair of wedge shaped rotatable discs Adjustable friction damping allows significant control
of the swing phase, making it easy to minimise any terminal impact

Adjustable friction Adjustable friction
damping screw Unlimited rotation \& 5 mm of shift in any direction

Dual function lock lever:
Position 1: Knee locked. With the lever in this position, the knee will extended.

Position 2: Knee unlocked Lifting the lever up to unlock the knee then wil releasing the lever the knee will automatically lock again on extension.
Lifting the lever so that it clicks past the first stop position will hold the kne an unlocked position, until the patient chooses
to click it down again. It will then automatically lock on extension.

This lightweight, polycentric knee has a pneumatic cylinder that provides a smooth swing phase control. It is compact and slim, making it an ideal option for children who have outgrown paediatric knee units or adults who require a slim cosmesis. When flexed, the knee's design still allows a neat and shapely cosmesis to be produced

Further features include adjustable geometry This allows the knee's geometric stability to be increased or decreased, dependant upon the patient's ability. This makes it particularly suitable wherever there is a need to readily change the way the unit transitions from stance to swing phase, whilst still providing positive prosthesis. prosthesis.

Features and Benefits
Pneumatic swing phase control - the independent adjustment of the flexion and extension valves, the individual needs of the user. On extension, the knee geometry automatically provides stance stability
Adjustable stance phase geometry can be easily
adjusted to provide the transition from stanci to adjusted to provide the transition from stance to swing that most suits the user's requirements Polycentric joint construction provides improved
ground clearance at mid swing, reducing the risk of catching the toe and stumbling

- Lightweight and robust
- Compact and slim
- High stance phase stability

High flexion angle at $160^{\circ}$

Adjustable stance geometry

The polycentric construction of these knees provide a high degree of geometric stance stability, by means of their long side links. A smooth pneumatically controlled swing phase automatically adapts to a wide range of walking speeds (up to $7 \mathrm{~km} / \mathrm{h}$ ) for a simple setup that requires no adjustment.

The NOPASO comes with a male pyramid adapter for angular adjustment, whereas the NKPASO comes with a laminating adapter with adjustable alignment discs, making it ideal for patients with very long residual limbs.

CES OSS K09: Read the NOPASO/NKPASO clinical evaluation summary on the Steeper website.

Features and Benefits
Auto-adaptive pneumatic cylinder allows a wide range of walking speeds as the cylinder automatically range of walking speeds as the cylinder automatic
and instantly responds to the user's inputs, whilst maintaining a safe stance phase
Transition into swing phase adjustable by means of stance wedges
Geometric design creates stance phase stability at heel strike
Polycentric construction provides improved ground clearance in swing phase
Adapter allows unlimited rotation and 5 mm of shift in any direction with either version, as is $10^{\circ}$ of angular adjustment

Auto-adaptive pneumatic swing phase control

Unlimite

The Kinegen Wave provides users with a number of technical advantages which are necessary for optimal safety and natural movement.
The high-quality knee joint is complemented by the modern design that is seen in the well-known models of the Kinegen series. A polycentric knee oint that has a high stance phase stability due for $K 2$ users. The mechanical shortening in the swing phase enables increased ground clearance whilst the manual lock provides additional safety Users can move freely and carefree in fresh, salt or chlorinated water thanks to its water-resistant materials.
 Waterproof note: Following exposure to chlorinater
water, rinse immediately with fresh water and dry

Features and Benefits

- Integrated extension assist spring

High stance phase safety due to polycentric design Ability to easily switch between free knee and locked knee
125kg weight limit
Male pyramid \& M36 Thread connection options Adjustable axis friction for swing phase control Waterproof in fresh, chlorinated and salt water*

Manual lock

Integrated channels for
water drainage

The Kinegen Stream is a polycentric unit with hydraulic swing phase control and pneumatic extension assist for active users up to 150 kg . It is geometrically stable in the stance phase and transitions smoothly into the well controlled swing phase with little effort required and excellent control of the fina $10^{\circ}$ of extension to prevent terminal impact.

The Kinegen Stream has a 'cycling' mode enabled by the user by means of a lateral push button with a bicycle symbol.

Features and Benefits
For active patients weighing up to 150 kg 'Cycling' mode enabled by the user by means of a lateral push button with a bicycle symbol High performance hydraulic unit with precise adjustment allows an optimal, individual customisation of the joint
Individually adjustable end position damping to reduce terminal impact
Conver fros to easily adjustable hydraulic swing phase damper

The Seattle Select Stance Flexion Knee is a tough polycentric unit which functions to a much higher level than might be expected from a pneumatically controlled knee. The Stance Phase Sensitivity can be adjusted by changing the instant centre of rotation (ICR), which makes the transition into swing phase more or less sensitive.

The flexion and extension resistances of the swing phase control are also independently adjustable, as is the stance flexion resistance, with additional interchangeable stance flexion springs supplied to accommodate a wide range of patient weights and activity levels.

NSSK615

Features and Benefits
Polycentric geometry creates effective shortening for improved ground clearance mid-swing
Adjustable stance flexion with $9{ }^{\circ}$ of movemen provides shock absorption at heel strike
Independently adjustable flexion and extension of the pneumatic swing phase control
Adjustable Stance Phase Sensitivity by means of changing the ICR
Integral extension assist spring
Available with built-in proximal pyramid or threaded adapter
Equipped with built-in knee cap, increasing safety and preventing clothing from becoming caught in the mechanism

The Guardian ${ }^{\text {TM }}$ Knee by College Park is a lightweight mechanical knee joint, suited to low-impact users learning to stand and walk in rehabilitation. It features a friction brake for stance control and extension assist.

Designed with the clinician and user in mind, it can be easily adjusted for gait matching without having to remove the prosthesis. As the patient progresses, the remote lock feature can be disengaged, allowing the knee to operate as a single knee axis joint and providing the full $145^{\circ}$ of anatomical motion.

Features and Benefits
A simple lock lever is located at the centre of the knee for easy access
Flexible remote Hand Operated (HOKL) or SemiAutomatic (SAKL) Knee Lock options to change with the user's requirements
Standard hex key can be used to adjust the extension assist, brake friction and sensitivity, without having to remove the knee
A small degree of stance flexion improves stability at loading response to mimic an anatomical gait pattern
The easily adjustable weight-activated brake will disengage when the limb is offloaded sufficiently during pre-swing, at which point an extension assist is enabled

The Victor ${ }^{\text {rM }}$ Knee by College Park is a singleaxis pneumatic knee joint, that can be adjusted to suit both slow and fast paced walking, suitable for low to moderate activity users. The knee features an adjustable weight-activated friction brake that can be adjusted to control stance phase, making it ideal for patients ease their activity level postrehabilitation.

Prosthetists can fine-tune the device according to patient preferences, and customise the pneumatic flexion and extension resistance for optimal movement.

Features and Benefits
Economical option that enables users to feel confident
Weight-activated friction brake and a small degree of stance flexion offers adjustable stability during of stance flexi
stance phase
Integrated extension assist ensures full extension with every step
Pneumatic swing phase control accommodates gait across varying walking speeds
Clinicians can easily adjust the knee to suit the user's preferences using a standard hex key

Technical Information

The Capital ${ }^{\text {TM }}$ knee by College Park Industries is a yielding, hydraulic, single-axis knee joint that is easy to use for both patients and clinicians. This knee effortlessly accommodates the user's variable gait thanks to smooth and responsive hydraulics in both the swing and stance phases The Capital knee is durable, sleek, and fresh water friendly, with easy mode selection and installation. The Capital is a strong reliable solution for moderate to high activity users.

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits
The Capital knee is designed to provide the user with a secure, responsive, and natural experience during
the gait cycle the galt cycle
The Capital Knee accommodates varying speeds from slow to fast using hydraulic control
Due to its yielding mechanism, the Capital knee allows
for controlled flexion of the knee during dom for controlled flexion of the knee during downhil
walking, allowing for stead This g, allowing for steady, smooth steps This lightweight, hydraulic knee can withstand many
freshwater activities. Patients can wear the Capita freshwater activities. Patients can wear the Capital
in the shower as the moisture will not wear on the system
The Capital's flexion, extension, and stance flexion resistance can all be adjusted using a 4 mm hex wrench - so clinicians can dial in swing flexion and extension as well as stance flexion resistance without having to remove the device

Ordering Information

The First liner is a clear, soft silicone interface liner that is suitable for for transtibial (below knee) amputees with good soft tissue coverage up to mobility class 2 . The unique self-gliding surface on the outside of the liner allows the liner to be fitted and removed easily from the sprays. The liner features a two zons matrix which reduces shear forces on the underlying soft tissue As there is no fabric cover there is no restriction of the liner's radial elasticity.

CES OSS LO1: Use this code to read the First liner clinical evaluation summary on the Steeper website.

1. Measure the circumference of the residual limb 4 cm above th
2. Attention: Bony structures (e.g end of the tibia) must be included ithe circumference. If the the above measurement, measure higher than 4 cm above the distal higher of the residual limb.
3. The circumference minus $0-1$ liner size determines the size to be ordered.
Determining the matrix
Measure the distance from the distal end of the residual limb to he head of the fibula.

Attention: The matrix must not go above the head of the fibula.
otes on trimming
The matrix must not be cut.
The trim line for a lower leg prosthesis should lie at least 10 cm aboge.
or trimming (Part No. N1950006).

The First 3 liner is a clear, soft silicone interface liner with thicker distal walls for added cushioning. It is suitable for below knee (transtibial) users who have a mobibility class of 2 . It features the unique self-gliding outer surface that makes it easier for socket donning and doffing, without the need for alcohol sprays or talcum powder. The liner has a 2-zone matrix which reduces shear forces on the underlyng sott tissue. As the lis is rabric cover there is no restriction of the liner's radial elasticity.

## . mm

The Protect 3C Cushion liner is a soft silicone liner that is particularly suitable for below knee (transtibial) amputees with reduced soft tissue coverage and/or poor skin condition up to mobility class 3. It contains a surgical grade oil and vitamin E , which the linere skin condition in little as 3 das. improve skin condition in as little as 3 days.

Designed to be used in a total contact socket with expulsion valve and suction sleeve, such with expulsion valve and suction sleeve, such as the Ossur Genu, a high level of suspension
can be achieved. The extra wall thickness of this liner provides very good cushioning and high comfort. An outer texture cover allows the liner to be fitted and removed from the socket easily without the need for time-consuming sprays.

Features and Benefits

Residual Limb Suitability

Even residual limb shape, good soft tissue cover

Residual limb bonier, rather More conical residual poor soft tissue cover and/ or with severe scars

## Classic Liners

These 4Seal Liners are designed for use in a socket with a distal expulsion valve and provides excellent suspension by means of its four integral seals.
The Easy Glide surface and flexible nature of the seals make the liner simple to roll on and negates the need for any lubricant when donning the socket.

The Umbrellan fabric, which is contained within the silicone as part of the liner matrix, provides both increased durability as well as pain relief from phantom limb pain, phantom limb sensation, and idiopathic residual limb pain.

## Senso Liners

The TFS/TFC above-knee 4Seal Senso liners ensures a secure fit between the residual limb and the prosthesis. The matrix of the 4 Seal Senso is woven with a particularly soft thread, this results in a pleasantly smooth surface inside the liner for the care of very sensitive residual limb skin.

The silicone used is very stable, kind to skin and easy to clean. Due to four comfortable and flexible sealing fins, it is possible to provide a pleasant wearing comfort without constriction.

The liner can be turned inside out and applied without the need for alcohol spray, providing more flexibility and independence.

The AKOS liners are silicone interface liners specifically designed for all mobility classes of above-knee (transfemoral) amputees. The liner has a continuous matrix with minimal axial stretch to make it comfortable to wear and provides a high transverse stretch to ensure optimal soft tissue grip. The flexible fabric ensures an optimal fit at the distal end of the residual limb as well as ease of donning. The which restricts stretch this also eliminates the need for time consuming sprays. Orientation marks on the liner help to ensure the liner is donned in the same position each time.

above the region of the above the rege.
3. Use the Össur pinking scissors for trimming
(Part No. N1950006).

The Relax 3C liner provides a pain-relieving effect from phantom limb pain, phantom limb sensation and idiopathic residual limb pain. This is due to the metallurgical knitted fabric (Umbrellan) in the cover and liner matrix screening against electromagnetic influences.
Electromagnetic shielding: As evidenced in Fisher K, Oliver S, Sedki I, Hanspal R. The effect of electromagnetic shielding on phantom limb pain: A placebo-controlled double-blind crossover trial. Prosthetics and Orthotics International. 2015.

Size Selection
Determining the size

1. Measure circumference $D$ (distal) of the residual limb 4 cm above the distal end of the residual limb. The
circumference minus $0-1$ liner size Circumference minus $0-1$ liner size
Attention: Bony structures (e.g. transfemoral border) must be included in the circumference. included in the circumference.
If the distal femur is not located within the above measurement,
measure higher than 4 cm above measure higher than 4 cm above
the distal end of the residual limb. The soft tissues must be tightly contained
2. Measure the length of the
residual limb length $L$ from the end of the residual limb $(-4 \mathrm{~cm})$ to the perineum.
3. Measure circumference $p$ *

4 The residual limb length and circumference are the basis for choosing the correct version of
the Össur Liner (transfemoral standard or conical).

Uniprox Liner Overview

The SoftSkin standard silicone liner range by Uniprox, offers a selection of shore hardnesses with an optional pin connection, or with a smooth distal contour. The liners include a matrix to reduce pistoning whilst the design of the outer knitted fabric allows the socket to be donned more easily.

Features and Benefits

- Improved grip contact
- Unique outer textile allows for easier socket donning Decreased skin irritation
- Machine-washable $\left(30^{\circ} \mathrm{C}\right)$

Available in three shore hardnesses: from the softer NS30 for more sensitive residual limbs, through to the stiffer NS5O liners suitable for higher activity
The smooth contour (cushion) liners are particularly
suitable for bony residual limbs, through-knee amputations and above knee residua with deep scars

Ordering Information
All liners are 3 mm thick, 370 mm long
Note: The circumference is measured 4 cm above the distal end of the residual limb

The SoftSkinAir® is a unique, breathable silicone liner featuring a distinctive structure and special micropores to reduce the build up of sweat and draw moisture away from the residual limb; providing a unique solution to patients who previously have been unable to proven a def due to high sweat levels. It has proven effectiveness in wearing tests and moisture level analyses.

Available in multiple shore hardnesses, with an optional pin connection, or with a smooth distal contour

位 distal matrix to further improve the reduction of longitudinal movements.

Features and Benefits
Wicks sweat via micropores

- Unique functional and progressive outside texture

Available with or without distal connector

- Machine-washable $\left(30^{\circ} \mathrm{C}\right)$
- Breathable and comfortable solution
- Improved grip contact

Unique outer textile allows for easier socket donning

- Decreased skin irritation
- Reduced temperature inside the liner

Available in three shore hardnesses: from the softer durable NS5O liners suitable for higher activities

Air Sport
Additional Features and Benefits

- Excellent wicking of sweat through micropores

Shore hardness: 40 Shore A (soft)
Additional distal matrix for more stability

- Sizes: 20-30
- Dual layer with silky inner surface

Reduction of elongation

Ordering Information
All liners are 3 mm thick, 370 mm long.
Note: The circumference is measured 4 cm above the distal end of the residual limb

The SoftSkin 2L and SoftSkinAir ${ }^{\text {® }}$ 2L are dual layer liners featuring a soft silicone inner for gentle skin contact, with a firmer silicone outer to provide stability.

The SoftSkinAir ${ }^{\otimes} 2 \mathrm{~L}$ offers the additional benefit of sweat wicking micropores to reduce moisture, resulting in drier skin and lower temperature within the liner for residual limb comfort and reduced skin irritation.

Features and Benefits
Soft on the inside, stable on the outsid (Shore hardness $30 / 50$ )

- Soft residual limb padding
- Innovative functional knitted fabric to reduce the longitudinal movement without an internal matrix
- Sizes: 16-45
- Unique functional outer fabric
- Machine-washable $\left(30^{\circ} \mathrm{C}\right)$
- Improved grip contact
- Decreased skin irritation

SoftSkinAir ${ }^{\circledR}$ 2L
Additional Features and Benefits

- Breathable and comfortable solution

The SoftSkin TF and SoftSkinAir ${ }^{\circledR}$ TF silicone liners offer the benefits of the Softskin range to a wider range of transfemoral users thanks to their increased size range.

With a shore hardness of 40 , these liners allow long lasting comfort to the user with high transverse elasticity to adapt to residuum shape.

The TF Air offers the additional benefit of sweat-wicking micropores to reduce moisture resulting in drier skin and lower temperature within the liner for residual limb comfort and skin irritation reduction.

SoftskinAir TF

## Features and Benefits

- Soft residual limb padding
- Perfect sweat evacuation through micropores Innovative functional knitted fabric to reduce the Iongitudinal movement without an internal matrix Sizes: 28-55
- Unique functional outer fabric
- Machine-washable $\left(30^{\circ} \mathrm{C}\right)$
- Improved grip contact

Decreased skin irritation

The ContexGel.basic is a conical shaped liner, constructed using 3 mm of uniform, soft ContexGel. making it ideal for below-knee and above knee amputees with bony and pressure sensitive residual limbs.

The viscoelasticity of the polymer gel ensures even pressure in the socket and reduces shear forces, combined with medicinal white oils and antibacterial properties to nourish and restore stressed residual limb skin. The liner is supplied with a stabilising matrix option, to eliminate longitudinal stretching of soft residual limb tissue.

Features and Benefits
Ideal for users with a low to moderate activity leve (1-3)
Can be provided without a distal connection for vacuum sockets
Offers superior protection and optimised shock absorption over the entire limb
Excellent circumferential elasticity compensates for residual limb volume changes
Circular knit design eliminates the need for lateral 'flat-lock' seams which were subject to excessive friction
Thermo-formable at $60^{\circ} \mathrm{C}\left(140^{\circ} \mathrm{F}\right)$
Distal rotation control supports the user when guiding their residual limb into their prosthesis
Soft silicone rotation caps

*Note: For transfemoral use it is advised that only the basic ( 3 mm ) option should be chosen See page 174.

A medical-grade mineral oil is contained in all Silipos gels, which gradually diffuses to moisturise and lubricate the skin.
Even in changing environments, the gel has the ability to conform to whatever shape or surface contour it comes into contact with. Because of the elasticity the cotient rather than the other can adapt to th way around.

The soft gel of the LA liner provides superior skin conditioning and comfort, for the low to moderately active patient, and is especially effective when used as a cushion liner with suspension sleeve, with or without a suction valve.

Features and Benefits

- Medium durometer gel makes this liner particularly suitable for low to moderately active patients, whilst providing increased skin care and comfort
Keeps skin and scar tissue soft and pliable
Prevents skin from becoming dry and fights the development of calluses
Helps prevent contact dermatitis and skin sensitivity problems
Available in tapered and uniform profiles for both pin and cushion liners
Available in the standard and the more conical, plus version
$3 \mathrm{~mm}, 6 \mathrm{~mm}$ and 9 mm gel options with 3 mm thickness posteriorly to accommodate knee flexion

By measuring your patient, and finding out where their measurements are in relation to the liners measures, you can select a liner which is firm in (for more active patients), more), or for the middle fit, which is suitable for the ma of patients. An example would be if your patient's distal measurement is 28 cm , and the proximal measurement is 42 cm , then he/she would fit perfectly in the mid-range of the Mediumt
Uniform - has a uniform thickness throughout the liner with the exception of the gel in the posterior.

Tapered - has 3 mm additional gel in the distal 10 cm for bon and conical residual limbs. The gel's flexibility is similar to having a distal end pad placed in the liner.

The SureFit Sleeve is constructed using HighDensity TPE Gel (HD Gel) to provide maximum comfort for the patient and long-lasting security. With a $30^{\circ}$ pre-flexion it allows for ease when bending and reduces bunching behind the knee; whilst the intelligent weave is adapted to differing areas of stretch and wear.

Features and Benefits

- $30^{\circ}$ pre-flexion

3 mm of uniform thickness
Low modulus of elasticity for correct compression and stability
One length $(400 \mathrm{~mm})$ to accomodate most users in three sizes
Two colour options available: Grey or Beige

design

Size Information
*Measure the thigh circumference 10 cm above the patella If the measured circumference falls within two sleeve sizes please order the smaller size.

Technical Information

The Streifeneder ContexGel.sleeves ensure correct suspension and fit in lower and upper limb prosthetic applications. They're effective at keeping air out of elevated system sockets and keeping the prosthesis firmly in place. Smaller sizes are suitable for upper limb belowelbow prosthetic sockets; larger sizes are suitable for below-knee amputees.

The latest bi-elastic knit design prevents tension and pinching on the knee joint, with 3 mm antibacterial Polymer Gel for optimal residual limb health.

Features and Benefits

- Conical shaped sleeve
- Available in two colours: mixed anthracite or sand
- Round-knit design with no lateral seams
- Soft, abrasion-resistant textile cover which can be Soft, abrasion-resistant t
easily donned or doffed
- Features an outer matrix to eliminate elongation in Features an outer matrix to
Excellent circumferential elasticity compensates for residual limb volume changes

## Size Information

ContexGel Knee Sleeves are available in six sizes. When determining patient size, please position the sleeve so that the middle section is sat over the knee/elbow joint

To determine the optimal size of the knee sleeve, measure
the distal socket circumference and the proximal thigh
circumference (approx. 15 cm above the centre of the knee joint)

|  | These sleeve protectors from Össur are <br> made of durable fabric that extends the <br> life of the suspension sleeve and protects <br> if from damage caused by the socket's <br> edge. Silicone pimples on the bottom <br> edge of the sleeve hold it securely in <br> place on the socket. |

The Genu is a soft silicone suspension sleeve that is 3 mm thick and designed for use with transtibial prostheses. It is gently tapered and though not pre-flexed, the elasticated fabric outer cover has a more openly knitted section over the patella to allow easy knee flexion.

This high level of flexibility is achieved thanks to Össur's expertise in round-knit technology. As a consequence, even when flexed, the sleeve is virtually wrinkle-free, and the user has a lot of freedom of movement.

Though it was designed to be used with a suction system to provide an excellent level of suspension, it can also be used as a stand-alone suspension sleeve for patients who are less active, or require a sleeve that allows easie knee flexion.

The Genu Sleeve is supplied with a sleeve protector as standard, though these can also be purchased separately. They're made from a durable fabric, which helps prevent damage from the edge of the socket and thereby improve the longevity of the sleeve. Silicone pimples on the bottom edge of the sleeve keep it firmly in place on the socket

Features and Benefits

- Highly flexible due to Össur round-knit technology
- Virtually wrinkle-free fit
- High freedom of movement for the user

Skinergy Plus provides an extremely high level of cosmesis for the below-knee user, incorporating a uniquely seamless finish and the latest innovation in silicone technology.
Because of its ease of use, increased durability, and improved realism, Skinergy Plus is a market leader for cosmetic off the shelf products.

Features and Benefits
Integrated reinforcing mesh and advanced silicone Integrated reinforcing mesh and ad
material for a more durable finish

- Now available in 19 colour shades with unique TrueFinish" micropigmentation and seamless finish for authentic realism
Split or closed toe options to suit any foot size 220 mm to 300 mm
- Two calf sizes

Easily removable for hardware adjustment maintenance or repair
Suitable for ankle disarticulation and partial foot applications
Easy to clean using soap and water
A Colour swatch kit is available to order to
demonstrate all 19 shades
3-month warranty

## Custom Silicone Cosmesis

Steeper invest in devising the most natural appearance covers for upper and lower limb prostheses, as well as cosmetic restorations and individual digits.
Our High Definition Custom Silicone cosmeses are sculpted in-house at our Silicone Clinic, in are sculpted in-house at our Silicone Clinic, designed bespoke to individual requirements.

Unlike many similar products, our fabrication techniques involve colouring the silicone material prior to sculpting, as opposed to surface painting. This process allows for the layering of different shades of silicone to give a translucent finish to the cosmesis, achieving an effect similar to natural skin.

Lower limb products within the range include:

- Individual toes
- Partial feet
- Full or partial limb covers
- Custom liners
- Cosmetic restorations

Custom silicone products are also available for upper limb patients. Please refer to the Steeper Upper Limb Catalogue for further information.

Technical Information
Spectromatch
The Spectromatch colour matching system stores 22,000 colours and offers a far superior colour matching process to traditional swatches.

As the system stores a large number of colours, numerous measurements can be taken and accurate colour options
recorded in minutes, regardless of the lighting conditions, to match individual skin tones.
The following steps must be taken for the process:

- Digital photography to show details of colour blending, hairs, veins, nails, freckles and tattoos of the sound limb.
- Cast modification to ensure the prosthesis fits securely over the residual limb.
- Check socket manufacture - for all partial feet and cosmetic restorations, to ensure suitable comfort and suspension. Colour matching using the Spectromatch camera - please contact the Silicone Clinic, who will be able to provide a
camera and details of the required steps within this process.

## Features and Benefits

Unique Spectromatch electronic colour matching process for a near-perfect match to an individual's skin shade

- Each cosmesis is sculpted by hand to meet the patient's specific requirements
Realistic appearance and touch
Skin pigmentation, freckles, veins, hair and tattoos can be incorporated for an authentic finish
Fabrication techniques involve colouring the silicone material prior to sculpting to give a translucent finis Lower limb and upper limb products available, including partial limbs and digits

Expert Technicians
Artists in their own right, all our silicone technicians are exceptionally skilled and can make any design, colour and shape required in silicone

From new material development to performance testing, our technicians often create more "avant-garde" designs to further develop their skills and identify improved ways of working.

## Case Study

Charlotte Swift
Travel Journalist
Extreme sports lover, Charlotte, talks about life as a below the knee amputee and her ongoing journey to stay active so that she can spend as much time as possible with her four year-old son.

Before the accident, Charlotte juggled a busy life in London and worked full time as a journalist. In 2013, she was a passenger in a car when it crashed.

Following her rehabilitation, Charlotte wanted to return to her normal activities as soon as possible - from caring for her young son and returning to work and even her previous
passion for extreme sports!
"For my everyday leg, I wanted something realistic." Able to be worn under all types of clothing, Charlotte's custom limb was made even more personal by including a swift tattoo to the foot to match her name - something our skilled technicians were more than happy to add.
Charlotte is thrilled with her cosmesis and the way it makes her feel "The ability to lead as normal a life as possible is so
important to me, and my high definition silicone leg allows me to do just that."

## Bespoke Service

Each silicone prosthesis is tailored to the user's exact equirements, from tattoos to painted nails, veins to surface hair and everything else in between.
Not only are all our products cosmetically tailored to suit the user but vitally, we always ensure the solutions we create are comfortable and functional, providing
users with a natural and realistic looking prosthesis that sers with a natural and realistic looking prosthesis that suits their lifestyle.

U uniprox

The Pro Armour Lite is a protective neoprene sock designed specifically for use with an endoskeletal prosthetic foot/ankle. Lightweight
and simple to use, it is applied directly over the prosthetic foot shell and structural ankle components.
The Pro Armour Lite aims to reduce damage and premature wear associated with exposing prosthetic devices to sand, dust, dirt and water The result is a cover that provides users with the confidence they need to explore more, and clinicians gain peace of mind knowing there is additional protection available whenever necessary.

Features and Benefits
Splash, dust, sand, and dirt proof
Washable and reusable

- Knitted sock provided to reduce friction when don/ doffing
Designed to extend the life of prosthetic foot components
Suitable for users of all activity levels
- Made for use with footwear only
- Available in three sizes

Compatible devices
The Pro Armour Lite is generally suitable for SACH, uniaxial ,
you're unsure if the Pro Armour Lite will fit your patient's vice, speak to your Steeper Product Manager.

Increases patient
confidence in everyday environments like off road

Encourages activity and positive wellbeing

The latest product from Pro Armour, the Pro Armour PLUS provides the same first-class protection as the Lite, giving amputees the ultimate freedom to walk footwear-free.

Thanks to the low profile rubberised sole, users can enjoy more footwear-free activities such as walking along the shoreline of the beach or but the neoprene properties ensure componts are protected from ingress of dirt.

Features and Benefits

- Splash, sand, dust and dirt proof
- 4 mm sole thickness
- Promotes physical activity and positive wellbeing

Low maintenance - washable \& reusable
Available in multiple sizes
Suitable for users of all activity levels

Foot Compatibility
The Pro Armour PLUS is generally suitable for most patient adjustable feet

The Pro Armour PLUS can give users more flexibility and
independence to do what they love most slip sole gives users confidence in knowing
they're safe from they're safe from
slipping on wet and uneven surfaces

The Relax range from Össur provides a painrelieving effect from phantom limb pain, phantom limb sensation and idiopathic residual limb pain. This is due to the metallurgical knitted fabric screening against electromagnetic influences. The Relax Night Care socks are the ideal complement to the Relaxill. as well.

Umbrellan fabric is a unique, patented knitted fabric with an excellent electromagnetic screen. The materials used on the metallurgical base are hypoallergenic, climate-regulating and have antibacterial properties.

The socks are elasticated with a soft top band providing a snug and comfortable non-slip fit. The Clima-Comfort technology ensures a high degree of comfort by transporting moisture rapidly from the skin to the surface of the stocking, reducing sweating. At the same time, the skin has an optimal oxygen supply to prevent it drying out.

Features and Benefits

- Pain-relieving effect due to integral electromagnetic shield
- Clima-Comfort technology - warming and cooling function depending on environmental temperature Elastic knit with soft top bands for comfor Suitable is day and night or whenever th prosthesis is not being worn

Umbrellan' with Clima-Comfort

Cleaning see Ordering Information

The ComforGel sock comes in three size and two thickness. They consist of a soft and stretchable cotton inner and outer fabric, sandwiching a soft polymer gel.
The emphasis on the softness of both the gel and the fabric, as well as the ease with which the socks can be stretched when donning, results in a high level of comfort and durability whe using these products. This makes them idea for patients who have sensitive or bony residual limbs, as well as those who are more active.

## Features and Benefits

Colour coded stitching to easily identify the two available Colour coded stitching to easily identify the $t$
thicknesses -3 ply (yellow) and 5 ply (green)
Incorporates a soft polymer gel, to provide gaed shock absorption, sandwiched between two layers of fabric for durability
The softness and stretchability of the fabric ensures ease of donning, and high levels of comfort
Transtibial sock accommodates up to 51 cm circumference
Transfemoral sock accommodates up to 66 cm circumference
Symes sock accommodates up to 36 cm circumference

- Easily conforms to irregular residual limb shapes and sizes

Streifyderm
The Streifyderm Gel Sock consists of a nylon fabric sock lined with a 2 mm polymer gel, particularly suitable for the moderately active transtibial amputee.

Streifyderm Cushion
Aimed at meeting the needs of the more active lower extremity amputees, or those with more bony or sensitive residual limbs, the Streifyderm Cushion uses an elasticated nylon sock and a thicker 3 mm polymer gel lining.

Streifyderm Endurance
The Streifyderm Endurance is made up of two elasticated nylon socks with a 2 mm polymer ge sandwiched between them to meet the needs of the very active lower extremity amputee.

## Features and Benefits

- Polymer gel contains premium medical mineral oil
- Improved skin care as the oil is released
- Reduced skin friction and abrasion
- Increased cushioning and comfort

Washable
Suitable for use in many types of socket, regardless

Features and Benefits

- Available in 3 and 5 ply
- Made from $100 \%$ pure Merino wool
- Absorbent, resilient, mild elasticity
- Precise fitting adjustments

## Ply Identification Colour code

Yellow 3 ply
Green 5 ply

Fine, highly elastic nylon protective sleeves that act as a second skin under the cotton residual limb sock.
The material textures ensure adherence of the sheath to the skin, and guarantees that the cotton residual limb sock dons easily.

Should be cared for with lukewarm water and a mild neutral detergent.

Features and Benefits

- High level of wearing comfort
- Colour: white
- 2 sheaths in each pack
- Washable

Skin-Fix is to be donned on the residual limb before slipping into the socket. Due to the low before slipping into the socket. Due to the low
friction design, donning of the socket becomes an easy and comfortable operation.

Then, the Skin-Fix can be pulled out through the valve easily.

Features and Benefits

- Low friction

Long-life durability
Simple application

| Aluminium 30 mm Structural Components |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Part | Number | Manufacturer | Description | Weight Limit |
| ${ }^{1 *}$ | NAAA210 | TL | 4-Hole Pyramid Adapter | 160 kg |
| 2 * | NAAA211 | TL | 4-Hole Female Adapter | 160 kg |
| 3* | NAAA212 | TL | 4-Hole Rotatable Adapter - Note: This part number is for the 4 hole base plate only. It will take either NAAA214-01 or NAAA216-01, these must be ordered separately. | 160kg |
| 4* | NAAA214-01 | TL | Rotatable Female Insert | 160kg |
| $5^{*}$ | NAAA216-01 | TL | Rotatable Male Pyramid Insert - Note: This part number is for the insert only. It can be used in either the 4 bolt adapter NAAA212 or the 3-Prong laminating adapter NAAASS237, these must be ordered separately. | 160kg |
| $6 *$ | NAAA209 | TL | 4-Hole Single Offset Pyramid Adapter - Offset by 5 mm in one direction only. | 160kg |
| $7 *$ | NAAA208 | TL | 4-Hole Double Offset Pyramid Adapter - Offset by 5 mm in two directions. | 160kg |
| $8 *$ | NAAA100 | TL | Adjustable Height Clamp Adapter - This clamp allows up to 25 mm adjustment in height, with the two bolt clamp being sufficient to hold the position, unless there is likely to be any significant impact in the patient's gait, such as jumping or running. | 160kg |
| $9 *$ | NAAA135 | TL | Pylon with Integral Receiver - This 30 mm pylon with integral female receiver can be used with either the NAAA10O or NAAA225 tube clamps, but at 420 mm long, is suitable for most transtibial applications and can be cut down to suit. | 160kg |

*Note: The weight limit is 123 kg for the NAAA aluminium components above for patients of K 4 activity level. Manufacturer: $\mathrm{TL}=$ Trulife

| Part Number |  | Manufacturer | Description | Weight Limit |
| :---: | :---: | :---: | :---: | :---: |
| ${ }^{1 *}$ | NAAA221 | TL | 35 mm Double-Ended Adapter | 160kg |
| 2* | NAAA222 | TL | 45 mm Double-Ended Adapter | 160kg |
| $3 *$ | NAAA223 | TL | 60 mm Double-Ended Adapter | 160kg |
| 4* | NAAA224 | TL | 75 mm Double-Ended Adapter | 160kg |
| 5* | NAAA200 | TL | 420 mm Bonded Pylon | 160kg |
| $6 *$ | NAAA202 | TL | 420 mm Aluminium Pylon Bonded to Male Adapter | 160kg |
| $7 *$ | NAAA225 | TL | 30 mm Clamp Adapter | 160kg |
| $8 *$ | NAAA285 | TL | Foot Pyramid - This foot adapter is specifically for use with the Seattle Lightfoot, Natural or SACH, though these now come with an adapter already fitted. | 136kg |

*Note: The weight limit is 123kg for the NAAA aluminium components above for patients of K4 activity level. Manufacturer: $\mathrm{TL}=$ Trulife

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

| Titanium 30 mm Structural Components |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number | Manufacturer | Description | Weight Limit |
| 1 | NTI-100C-FL | APC | Titanium Tube Clamp Adapter | 166 kg |
| 2 | NTI-100C-SH | APC | Titanium 30 mm Tube Clamp Adapter Short - This adapter has been designed to provide a build that is approximately 10 mm shorter than the standard clamp, with the knurled inner surface of the clamp providing the necessary grip to prevent rotation | 166kg |
| 3 | NTI-205C | APC | Titanium 5 Degree Angled Tube Clamp Adapter (pictured) | 166 kg |
|  | NTI-210C |  | Titanium 10 Degree Angled Tube Clamp Adapter | 166 kg |
|  | NTI-215C |  | Titanium 15 Degree Angled Tube Clamp Adapter | 166 kg |
|  | NTI-220C |  | Titanium 20 Degree Angled Tube Clamp Adapter | 166 kg |
| 4 | NTI-120P | APC | Titanium Tube Clamp w/ Pyramid Adapter | 166 Kg |
| 5 | NTI-740L | APC | Titanium 4 Prong Laminating Base w/ Fixed Pyramid Adapter | 166 Kg |
| 6 | NTI-110LONG | APC | Titanium Pylon with Receiver Adapter (Overall length $=96.5 \mathrm{~mm}$ ) - This pylon, with its integral female receiver has an overall length of nearly 100 mm , but can be cut down very short and with the use of NTI$100 \mathrm{C}-\mathrm{SH}$ can provide a double adapter of less than 60 mm , with rotation. | 166 Kg |
|  | NTI-110SH | APC | Alternatively, use the NTI-110SH (pictured) which is approximately 50 mm in length. |  |
| 7 | NTI-105C | APC | Titanium Heavy Duty Tube Clamp, 5mm Offset | 166kg |
| 8 | NTI-125P | APC | Titanium Pyramid / Receiver Adapter | 166kg |
| 9 | NTI-112-P | APC | Titanium 30mm Pylon (SHORT) w/Pyramid Adapter - Overall Length of 2.46" Accommodates 1 - NTI-100C | 166kg |
| 10 | NTI-130D | APC | Titanium 30mm Dual Receiver Adapter | 166kg |
|  | NT-132D | APC | Titanium 32 mm Dual Receiver Adapter | 166kg |
|  | NTI-138D | APC | Titanium 38 mm Dual Receiver Adapter | 166 kg |
|  | NTI-145D | APC | Titanium 45mm Dual Receiver Adapter | 166 kg |
|  | NTI-152D | APC | Titanium 52 mm Dual Receiver Adapter | 166kg |
|  | NTI-160D | APC | Titanium 60 mm Dual Receiver Adapter | 166 kg |
|  | NTI-168D | APC | Titanium 68mm Dual Receiver Adapter | 166 kg |
|  | NTI-175D | APC | Titanium 75 mm Dual Receiver Adapter | 166kg |

Note: Whilst the components showing the blue water symbol are therefore waterproof, please note that these components do not have drainage slots.
Note: See pages 244-245 for the Mix and Match APC Alignment Adapters Component Build Height Information

# Structural and Socket Components - 

30mm Titanium \& Stainless Steel

9 NAL-420L APC

| Titanium 30 mm Structural Components |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Part Number |  | Manufacturer | Description | Weight Limit |
| 1 | NTI-17TC2-BLACK | APC | 440 mm Pylon with Titanium Receiver Adapter BLACK | 166 kg |
| 2 | NTI-10TC2-BLACK | APC | 262 mm Pylon with Titanium Receiver Adapter BLACK | 166kg |
| 3 | NTI-10TC2-I-BLACK | APC | 262 mm Pylon with Internal Titanium Receiver Adapter BLACK | 166kg |
|  |  |  | This pylon has its adapter bonded to the inside of the tube, which some clinicians prefer the appearance of and also allows it to be cut much shorter, should the need arise. |  |

Note: Whilst the components showing the blue water symbol are therefore waterproof, these components do not have drainage slots.

| Stainless Steel 30 mm Structural Components |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Part Number |  | Manufacturer | Description | Weight Limit |
| 1 | NSS-800LM | APC | SS 3 Prong Adapter with Rotatable Pyramid | 125kg |
| 2 | NSS-850LM | APC | SS 3 Prong Adapter with Rotatable Receiver | 125kg |
|  | NSS-800BASE | APC | SS 3 Prong Adapter Threaded with Female Thread This part number is only for the adapter, as used on NSS800LM and on NSS-850LM with their stainless steel pyramid and female receiver. It will take either NTI-5OFS or NTI-OOMS to provide a lighter build, or any component with an M36 threaded top. | 125kg |
| 3 | NSS-50FS | APC | Stainless Steel Receiver with Male Thread <br> This item can be used in the baseplate NTI-46OTB or any adapter with an M36 thread. | 136kg |
| 4 | NTI-420L | APC | Titanium Round 4-Hole Laminating Plate <br> This simple 4.8 mm thick lamination plate, with 4 M 6 threaded holes, comes with 4 of each M6×20mm and $\mathrm{M} 6 \times 25 \mathrm{~mm}$ water resistant screws and is ideal for laminate sockets, but can also be used on thermoplastic sockets, provided a flat surface can be achieved onto which a 4 hole adapter can be bolted. | 166kg |
| 5 | NSS-OIMS | APC | Stainless Steel Rotatable Pyramid with Threaded Clamp | 136 Kg |
| 6 | NSS-OOMS | APC | Rotatable Pyramid with Male Thread | 136 kg |
| 7 | NTI-TF900SET | APC | Titanium Thermoplastic Socket Attachment Plate Set This two-piece socket attachment plate has been designed for use on thermoplastic sockets, to provide a flat mounting surface for any 4 -hole adapter, but can be used on laminated sockets as well. | 166Kg |
| 8 | NAL-TF900SET | APC | APC Aluminium Thermoplastic Socket Attachment Plate Set This two piece socket attachment plate has been designed for use on thermoplastic sockets, to provide a flat mounting surface for any 4 hole adapter, but can be used on laminated sockets as well. | 100Kg |
| 9 | NAL-42OL | APC | APC Aluminium Round 4-Hole Laminating Plate Threaded This simple aluminium plate, with 4 threaded holes, is ideal for use with laminate sockets, but can also be used on thermoplastic sockets, provided a flat surface can be achieved onto which a 4 hole adapter can be bolted. | 100Kg |

Note These Stainless Steel components are not waterproof or water resistant

Manufacturer: $\mathrm{CP}=$ College Park

The Cioo Cylindrical Shuttle Lock by College Park is used as a modular lock system for lower limb prosthesis users. It is made of high-strength durable nylon.

Lightweight with a secure fit, the release pin can be easily cut to the right length for the prosthesis. Supplied with two ratchet plunger
pins in variety of lengths. pins in variety of lengths.

Features and Benefits

- Manufactured from high-strength and durable nylon
- Ratchet plunger pins are available in 5 sizes
- C100 Fabrication Kit available for ease of manufacture with the Shuttle Lock
- Designed for direct mounting with a 4-hole adapter
- Lightweight build, weighing 88 g with the ratchet pin
- Rated to 136 kg

## C100

Fabrication Kit

The C100 Fabrication Kit provides the practitioner the ability to form adequate space for the lock to sit in.

## Part Number

NC100-SLK-FAB

Features and Benefits
Gives correct placement and formation of the release button hole Provides guides to drill an industry standard 36 mm square 4 -hole pattern for endo-components
Can be used for multiple socket fabrication set-ups.

## Streifeneder Waterproof Shuttle-Lock

The Shuttle lock NMA15S2/W is characterised by its very small design and a high strength aluminium housing. Suitable for fresh, salt or even chlorinated water and manufactured in an excellent quality. The aluminium housing can be removed from the deep-drawing socket and used for the laminating socket. Processing is carried out using common deep-drawing or laminating methods.

Spare Parts Ordering Information
See page 280 for a full list of Series 150 spare parts

## Features and Benefits

No body weight restriction because the lock is not a weight bearing component
Activity level: 1 to 4

- Can be used for thermoplastic and laminated sockets
- Aluminium housing
- Mounting height: approx 23 mm
- Waterproof ${ }^{*}$
- Incl. Lamination dummy NMA1OS1/E6
- Incl. special sealing grease NMA22A100
- Twist-proof pin guide made of stainless steel
- Locking unit completely exchangeable

## Streifeneder Locking Systems

The large choice of locking systems enables the technician to create a socket connection adapted to the patients‘ requirements. Eveary Streifeneder lock system unlocks under tensile load, which enables the patient to easily unlock the prosthesis even under tension, .g. in a sitting position. A lockable mechanism is offered as an accessory or the clutch locks, which makes it easier for geriatric patients, in particular, to take off the prosthesis. The locking systems are differentiated by the locking type and housing design.

## Series 100

The lock series 100 is made of synthetic material, which makes it lightweight and very small. It is suitable for users of any weight category. NMA12A7 (see page 252) the deviation of the Mind (slient and the line can
 corrected.

## Features and Benefits

no body weight restriction because the lock is not a weight bearing component
Activity level: 1 to 4 for NMA1OS1 and NMA1OS2
Can be used for laminated sockets

- Plastic housing is temperature resistant up to $200^{\circ} \mathrm{C}$
- Locking unit is exchangable
- Replacement button extension available on page 280

## Series 200

The lock series 200 by Streifeneder is made of aluminium and is distinctive due to its light and flat design. Distally, various socket adapters can be used.

1

Features and Benefits

- Max. patient weight: 125 kg

Includes 1 pin \& lamination disc
Activity level: 1 to 4 for NMA2OS1 and NMA2OS2
Activity level: 1 to 3 for NMA2OS3
Can be used for thermoplastic and laminated sockets
Aluminium housing
Please note: For direct load transmission from lamination Please note: For direct load transmission from lamination
disc to different adapters use the countersunk screw NMA22A5/M6x40

Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism light, flat construction
Non-rotating lamination disc with multiform ring

- Continuous guide bushing made of stainless stee

Distally with channel for planar connection of all socket adapters with 4-hole connection
Easy cleaning and replacing of complete locking unit is possible without dismantling the prostheses
With Lamination Disc NMA20S1/E5

## Series 400

The series 400 from Streifeneder is especially suitable for AK and BK-residual limbs with very suitable for AK and BK-residual limbs with very large distal circumference. The housing, mad fitted with an adjustment core for a compact construction.

## 3

Features and Benefits

- Max. patient weight: 125 kg

Activity level: 1 to 4 for NMA40S1 and NMA40S2
Activity level: 1 to 3 for NMA40S3
Mounting height: approx. 33 mm
Can be used for thermoplastic and laminated sockets

- Aluminium housing

Please note: order press button extensions for geriatric patients or big sockets separately

- Clutch-Lock with "EasyClick" system: optimised pull in and release mechanism
With socket adapter NMA1OA21/S for laminating into the socket
With lamination dummy NMA22A9
With distal adjustment core
Easy cleaning and replacing of complete locking unit
Incl. special sealing grease NMA22A100

Waterproof Shuttle-Lock

The Xtend Connect by Lindhe Xtend allows the quick exchange between different prosthetic components. Depending upon the lifestyle and usage needs of the user, the same prosthetic socket can be worn across multiple limbs with the use of this device.

Suitable for both transtibial and transfemora applications, the system is ideal for quickly disconnecting the prosthetic foot to make be worn with feet set to varied heel heights without the need to change footwear.

## Waterproof ${ }^{+}$

note: Following exposure to water, rinse immediately with fresh water and dry.

Features and Benefits

## 150kg weight Limit **

Quickly exchange feet whilst keeping the same socket, and maintaining optimal alignment of prosthesis
Change sockets whilst keeping limb builds intact Designed to be used with industry standard 30 mm Greater flexibility when dressing - such as removing feet to pull on trousers
Waterproof in fresh water, sea water and chlorinated water with appropriate care*
Less baggage - wers can pack prosthesis without having to pack the entire limb build
Safety button ensures secure connection from the Sr
Orange wheel colour available

Ordering Information
Please note: These devices do not have a trial period as standard. If you wish to discuss the Xtend Connect please contact your local product manager for advice prior to placing your order.
Impact Level Descriptions
Low: Daily activities include mostly level ground walking, moving around in the home and the community
Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running)

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

Torsion Adapters from College Park allow smooth transverse rotation of a patient's limb build. Users can twist and turn with ease allowing a maximum of $20^{\circ}$ of both internal and external rotation. Reducing stress and force on the patients' socket and residual limb. Available in a choice of titanium and aluminium or stainless steel. These versatile and durable components can be easily adjusted by prosthetists to improve user comfort when walking and participating in sporting activities.

## Features and Benefits

- With $+/-20^{\circ}$ of rotation, the additional movement benefits a wide range of users, increasing comfort and allowing for a more natural feeling when turning.
This adapter is suitable for low to high impact activities.

The torsion adapter's resistance can be easily adjusted by a prosthetist using a 4 mm Allen Key
A variety of attachment options including male to female pyramid adapter

The RevoFit ${ }^{\text {® }}$ Lamination Kit allows you to create built-in user-controlled adjustability anywhere on a socket, letting users make incremental changes to their socket fit and volume throughout the day without the need to add or remove socks.
For use with all commonly used lamination materials, the RevoFit uses a tried and tested system of manufacture. This kit has been ormulated to resist the repetitive stress found durability (HD) fatigue-resistant lace. Thig system is well established and empowers user by allowing adiustability; it is complimented by the user-friendly Click Reel providing additional benefits including a balance of precise adjustment and power, offering up to 7:1 mechanical advantage.

## Waterproof*

 CWaterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Adjustable global and/or targeted compression
- Micro/macro adjustments to increase and to decrease socket volume
- Easy adjustments through clothing
- Optional grip rings to suit user dexterity need Rapid donning \& doffing for challenging residual limb shapes
- User Weight Limit: 135kg

RevoLock ${ }^{\circledR}$ Align is a lanyard suspension system providing users with unrivaled control over the lanyard tension at all times, including when donning and doffing of a socket over a liner. The latest release introduces a number of additional features These features include an optional Slider kit (to maintain proximal cable tension in sitting, even after distal tension is released), and a Quick Connect Snap insert (allows the lanyard to move more freely and the liner to be easily (dis) engaged). This kit is commonly used in both upper and lower limb devices, and allows the users alignment to be devices, and allows the users alignodated within the socket. RevoLock accommodated within the socket. RevoLock offers all the
suspension.

The RevoLock ${ }^{\circledR}$ 4-Hole Kit offers an alternative way of applying the familiar RevoLock technology with industry standard 4 hole alignment systems.

The Revolock Lanyard V2 Kit is designed to be similar to the original RevoLock Lanyard Kit, including the familiar BOA ${ }^{\oplus}$ dial and the former distal housing/threaded insert. The RevoLock Lanyard V2 restores a wellestablished adjustable suspension solution that meets with user expectations in a simple, easy to follow way.

## Features and Benefits

Align Kit

- Compact, suitable for users with residual limbs of a variety
of shapes and of the usual sizes
- Transferable alignment
- Locked and hidden chord
- 38 mm build height
- Reduced pistoning
- Eliminates locking pin alignment frustrations
- Slider kit allows user to lock the Click Reel power mode on

No tool form required for manufacture
User Weight Limit: 135kg
4-Hole Kit

- Industry standard 4-hole interface
- Locked and hidden chord
- 25 mm build height
- Reduced pistoning
- Eliminates locking pin alignment frustrations
- Slider kit allows user to lock the Click Reel power mode on demand
RevoLock ${ }^{\circ}$ Tool form required for fabrication, sold
seperatley seperatley
User Weight Limit: 135kg
Lanyard V2 with BOA Dial
- For transferable alignment
- Single or double-stage lamination
- Low 25 mm build height
- Reduced pistoning
- Upper or Lower extremity sockets
- Lightweight system
- No tool form required

The RevoSurface ${ }^{\bullet}$ Tool Kit not only allows you to pre-build adjustability into check sockets, 3D printed devices, and orthoses, but also to retrofit adjustability into existing sockets. This kit allows the volume of a (previously rigid) socket to be manipulated by the user throughout their day, without the need to doff their socket.

For use with a variety of materials, the RevoSurface ${ }^{\ominus}$ has been specifically designed to mosurace has been specifically designed to ssociated with an adiustable socket The system includes a Hiah Capacity (HC) lace for ultimate user adjustability, The user-friendly Click Reel provides a balance of precise adjustment and power offering up to $7: 1$ mechanical advantage.

## Waterproof*

chlorinated "Waterproof note: Following exposure to chlorinated
water, rinse immediately with fresh water and dry.

## Features and Benefits

Easily add adjustability to prostheses and orthoses made from a variety of materials

- Can be refitted when the socket is updated, making this kit more suitable for early intervention
- Can be used as a solution when troubleshooting during appointments
- Retrofit to patients rigid devices, giving them freedom to micro-adjust their fit anytime with the turn of a dial
- Improve patient acceptability
- Suited to Orthotic and Prosthetic applications
- User Weight Limit: 135kg

Click Reel offers up to 7 mechanical advantage.

The Click Medical QuickFit Lacers are an easy to use fastening solution, allowing microadjustments throughout the day. They can be retrofit to footwear, or used for other light closure applications in prosthetics and orthotics to offer a range of benefits with upper limb absence, or limited mobility.

## Features and Benefits

One-Hand, Micro-Adjustment
niform compression is easily achieved with a one handed twist of the easy grip dials, allowing patients with limited fine motor skills to adjust fit in seconds throughout the day

- Pre-Laced System

Kit choice and fabrication is made simple with four ready-to-install sizes
Easily Replaceable Components
Easily replace the dial and lace, with no need to remove rivets or re-fabricate device

- Proximal to Distal Tension Pull Even-tension pull proximal to distal means no need to manually redistribute tension as with traditional lacing. Nylon-coated steel lace is low friction and high strength
Rivet On
With double-cap press-fit steel QuickFit rivets, thes are retrofittable to other systems and easy to install
with the QuickFit Tool, along with durable, low-profile lace guides

| Aria Valves <br> Designed specifically for use in transtibial suction sockets of any type, these auto expulsion valves are fairly small, at 22 mm diameter and have a low profile. They are best installed using the M10 threaded housing/dummy to drape or laminate over, or they can be retro-fitted into an existing socket by drilling and tapping out the socket material. The Plus version has a push button to release the suction, making it ideal for use with a suction seal liner, such as the 4 Seal, whereas the other option has no button, but is fine for use on a suction sleeve system. |  |  |
| :---: | :---: | :---: |
| Part Number |  | Description |
| 1 | NCA200-AV | Aria Valve - Includes threaded housing (Image shows all black imperial components) |
|  | NCA200-AVM | Aria Valve - Includes threaded housing (Image shows black/grey metric components) |
| 2 | NCA200-AVP | Aria Valve Plus - Includes threaded housing - with push button components (Image shows all black imperial) |
|  | NCA200-AVPM | Aria Valve Plus - Includes threaded housing - with push button (Image shows black/grey metric components) |
| 3 | NCA300-HYV | Aria Hybrid Valve - for all elevated vacuum applications. Features a built in barb attachment (with internal check valve) for connection to any vacuum pump system. |
|  | NCA100-AK | Aria AK Valve Auto Expulsion (Including Grip Key) |
|  | NCA-100-M | Universal Mini Valve |
|  | NCA300-b90 | 90-Degree Stainless Steel Barb |
|  | NCA300-AVT | Aria Valve Tool - this allows a valve to be screwed in or out, even when mounted in a recess and the other end is for removing the valve caps. |
|  | NCA300-ASBM | Aria Safety Barb- features a 90 degree swivel fitting and an internal 1-way safety valve to prevent loss of vacuum in the case of hose disconnect or pump/hose malfunction. |
|  |  | This part number is for the metric thread. |

Pee Wee Valve SI
This small, manually operated valve has a high air flow capacity. Its low profile design, at only 14.2 mm diameter and 6.3 mm
hish makes it suitable for both lower and This small, manually operated valve has a high air fiow capacity. Its
high, makes it suitable for both lower and upper limb applications. It can be retro-installed by drilling and tapping through
the the socket. A threaded housing is also available to allow it to be used in soft thermoplastic sockets. Threaded housing NPA

salt or chlorinated.

The Child's Play Energy foot is a paediatric version of the Seattle Energy. Its integral cosmesis varies by size to reflect the natural appearance of a child's maturing foot and provides shock absorption at heel strike, whilst the composite keel allows a smooth roll-over with dynamic response at toe-off for a natura giz. Depend size, there are six keel options to choose from o help optimise the foot's action.

## Water-resistant*

Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly
salt or chlorinated.

Category Selection Instructions
To determine which keel is appropriate for your patient, check the below table for keel availability by foot size. Please note that size 13-15 feet do not have sandal toe foot
potient loads, or patient has a long BK limb, regularly carries heavy loads, or

Warning: Choosing a lower strength category than what is suggested based on the above procedure and patient data
will void the warranty. If your patient's weight exceeds the will void the warranty. If your patient's weight exceeds the foot options or contact our customer services department.

Features and Benefits

- Low profile selectable keel design

Smooth roll-over and dynamic response
Natural appearance
Choice of foot shell colours
Sandal toe (sizes 16-21

- Large range of sizes (13-21)

Safe for occasional contact with water, but not contact with salt or chlorinated water, foot should be contact with salt
rinsed/cleaned.

## Cosmetics

Sandal Toe Foot shell

Foot construction with foot shell
removed

This lightweight polycentric knee is a robust unit with all the features you'd expect from a child's knee, but with one very useful additional feature. It has the facility to be set up as a semi auto or manual knee lock. This makes it particulas or with eth for a child with bilateral limb loss, or with other functional issues, such as muscle weakness in the sound limb.

The lock can easily be removed should the child's ability not require it, or when an appropriate level of rehabilitation has been appropriate level of rehabilitation has been achieved. It can be just as easily replaced
should there be a deterioration in function, such as following surgery.

Features and Benefits

- Polycentric design
- Lightweight
- Friction control of swing phase
- Extension assist
- Adjustable stance stability
- Optional manual lock

Knee disarticulation adapter available (replaces the removable pyramid)

Ordering Information
Loaner units are available for this knee, please contact Customer Services for further details.
