## PROTEOR Foot & Ankle Prostheses

PROTEOR'S mission is to create and provide solutions for people who want to increase their independence and well-being.

Inspired by the achievements of users, PROTEOR offer a diverse range of advanced technologies designed for maximum mobility, adaptability, and durability. They collaborate closely with users, healthcare professionals, and university researchers to create the prostheses of tomorrow. Embracing sustainability, PROTEOR utilise lighter, less toxic, and recyclable materials, and their commitment to the environment extends to their industrial practices, with initiatives for recycling and waste recovery. PROTEOR believe in the power of collective effort to achieve incredible outcomes, continually pushing the boundaries of what is possible.

# Kinnex 2.0

The Kinnex 2.0 uses cutting-edge microprocessor technology to provide superior ground compliance for low to moderate impact ambulators (K3) during everyday activities. The hydraulic system uses optimised seal technology and a robust cylinder design. The Kinnex 2.0 delivers reliable energy storage and return throughout the day.

### Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Sensor-controlled ankle movement reads and processes data at a rate of 200 times per second, and Rapid Response™ valve technology responds at a rate of 5 milliseconds
- The carbon fibre split heel and keel design provides optimal support and range of motion to reduce internal socket pressure, helping to accommodate obstacles and uneven terrain
- Clinicians can use the GaitLab app to lock the ankle in a neutral position for alignment and calibration, customise the setup of the device, and monitor outcomes
- Optimised hydraulic oil reservoir and seal technology for increased oil capacity and longevity
- IP67 rated - up to 30 minutes in 1 metre of fresh water
- Dynamic lock provides a firm foundation, and can be engaged/disengaged using the app or via the button panel on the front
- Apparel Assist Mode locks the foot at an angle, making it easier for the user to change clothes or footwear
- 20° plantar flexion and 10° dorsiflexion range of motion means the foot is ideally positioned with the ground
- User App allows the user to make limited fine resistance adjustments
- Up to 2" of heel height adjustment allows users to store up to 100 shoe styles in the User App

Low Battery Feature & Manual Lock

## Ordering Information

Trial Period - This foot has a 14 day trial period.

**Note:** Once the definitive foot has been purchased there is no trial period.

### Impact Level Descriptions

**Low:** Daily activities include mostly level ground walking, moving around in the home and the community.

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

26-28	18.6	1494g
29-30	18.6	1553g

# Kinterra 3.0

The Kinterra 3.0 is a well-proven hydraulic ankle that consistently sets higher standards for reliability, comfort and stability. This Foot/Ankle System combines carbon fibre and hydraulic technologies to enhance the walking experience for low to moderate impact K3 ambulators, ensuring improved stability on slopes and varied landscapes.

The Kinterra 3.0 model has a 20% increase in user weight rating compared to the previous 2.0 model. The prosthesis can accommodate body weights up to 150kg without compromising product weight and function.

The hydraulic ankle has 2° of dorsiflexion leading to a spring bumper and 15° of plantarflexion. The yield resistance can be adjusted independently for both plantarflexion and dorsiflexion. While ascending slopes, the full-length carbon fibre split keel provides a smooth supportive transition. Personalised action throughout the ROM provides a very effective and comfortable gait for the user - particularly while descending slopes. This device works well when used in combination with a microprocessor knee.

Water-resistant\*

\***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- 150kg maximum patient weight
- Increased ROM – Energy return and socket comfort without sacrificing stability
- 17° hydraulic ankle articulation – 15° of plantarflexion and 2° of dorsiflexion allow the foot to reach and maintain footflat across differing terrains and improved socket comfort whilst sitting
- Dorsiflexion assist spring – Returns the ankle to 2°DF when unweighted, decreasing risk of toe catching during ambulation
- EnduraCore® footplate for energy return and a smooth rollover. A split heel and heel provide mediolateral stability and terrain adaptation
- Decreased build height and increased compatibility
- Submersible in fresh water up to 1 metre for 30 minutes

## Ordering Information

Trial Period - This foot has a 30 day trial period.

### Impact Level Descriptions

**Low:** Daily activities include mostly level ground walking, moving around in the home and the community.

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

# Exalto®

The Exalto foot offers energy storage capabilities, crafted to provide a secure and comfortable daily experience for individuals with low to moderate activity levels K1/K2. As a result of the split heel and full-length split keel design, Exalto provides a gradual and seamless rollover. It contributes to boosting patient confidence with each step taken.

Waterproof\*

\*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Dual split blades, each spanning the entire length of the foot to promote stability and facilitate a comfortable rolling motion
- Adapts to uneven terrains by enabling the inversion/eversion movements of the split blades
- Optimised lightweight design
- Accommodates patients weights up to 166kg
- Resistant to immersion in salted and chlorinated water
- Low profile C-shaped spring promoting stability while facilitating a comfortable progression throughout stance phase

CAP

Solid toe foot shell

29-31	11.8	700g

# Sierra®

Ideal for active users, the Sierra foot ensures a smoother gait without the energy loss typically associated with other shock absorbing systems. Its unique angle-top design increases the length of the carbon fibre spring, which maximises energy return and flexibility. The split-keel provides excellent inversion/eversion, allowing amputees to walk with confidence on uneven terrain.

Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Full length heel ensures exceptionally smooth gait
- Split-keel design
- Integral male pyramid
- Available in 9 stiffness categories

Sandal toe:  
sizes 22-28 only

Mid profile foot shell

# DynAdapt™

The carbon fibre DynAdapt foot is easy to fit and cover with a cosmesis thanks to its slim profile and anatomical design. The full-length split keel provides a smooth, uninterrupted roll-over from heel-strike to toe-off, as well as the medial/lateral compliance needed for good stability on uneven terrain. The advanced composite laminate delivers a high cycle fatigue in a design that also gives a high energy return.

**CES FRE F07:** Use this code to read the DynAdapt clinical evaluation summary on the Steeper website.

Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Slim profile, carbon fibre foot system with a slender, anatomical design
- Multi-axial function for maximum comfort
- Full length split keel gives an uninterrupted roll-over with good compliance and a dynamic response through to toe-off
- EnduraCore Technology® delivers up to 3 times the fatigue life of a standard laminate
- Available in 9 stiffness categories

Sandal toe:  
sizes 22-28 only

Mid profile foot shell

# Pacifica LP®

The Pacifica LP offers proven performance in an ultra-low profile design, which requires less than 50mm of clearance for most commonly used sizes. The split-keel design provides stability-enhancing inversion and eversion as well as being lightweight and durable.

Water-resistant\*

\***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Ultra low build height
- Integral male pyramid
- Split keel design
- Foot lies within the foot shell to improve cosmetic finishing
- Available in 9 stiffness categories

Sandal toe:  
sizes 22-28 only

Foot shell

## Ordering Information

Trial Period - This foot has a 30 day trial period.

### Impact Level Descriptions

**Low:** Daily activities include mostly level ground walking, moving around in the home and the community.

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

**High:** Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

**Note:** Although the 'high' impact level states 'running' as an appropriate activity, the Pacifica LP is not ideal for running.

# Highlander®

Engineered for active amputees who require a lower build height foot, the Highlander foot provides a smooth gait and excellent energy return. The split-keel provides stability on uneven terrain by enhancing inversion and eversion. Many transfemoral amputees prefer this foot because of its ideal balance of stability and dynamic response.

Water-resistant\*

\***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Low build height with integral male pyramid
- Split keel design for excellent inversion/eversion
- Weight limit 166kg
- Available in 9 stiffness categories

## Ordering Information

# Highlander® MAX

The Highlander Max enables the benefits of the Highlander to be made available to amputees over 166kg. With an industry highest weight limit of 226kg, this foot can be used in conjunction with the Heavy Duty Component Kit (NAC 202) to provide a prosthesis to virtually any transtibial amputee.

Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Low build height with integral male pyramid
- Split keel design for excellent inversion/eversion
- Available up to weight limit 226kg
- Available in 3 stiffness categories

## Ordering Information

**Note:** Highlander Max is a special order item, therefore please allow a 10-14 day lead time. There is no trial on this product.

### Impact Level Descriptions

**Low:** Daily activities include mostly level ground walking, moving around in the home and the community.

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

# Agilix™

The Agilix™ is a multi-axial, shock-absorbing flexible foot system designed to manage loading impacts, reduce socket shear forces and improve comfort whilst walking on uneven terrain. The ultra-lightweight design offers K3 ambulators comfortable performance.

Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Vertical shock absorption and carbon fibre flexibility optimised for low to moderate impact K3 ambulators; reduces socket shear forces and improves overall comfort
- Split keel design for increased durability
- Multi-axial function increases ground compliance and stability
- Full-length dynamic heel attached at the toe ensures a seamless roll-over, for superior comfort and a more symmetrical gait
- The low profile and lightweight design of the Agilix allows users to do more and feel less tired at the end of the day

Sandal toe: sizes 22-28 only

## Ordering Information

Trial Period - This foot has a 30 day trial period.

# Shockwave™

The Shockwave incorporates a Spherical Shock Unit (SSU) and proprietary EnduraCore® composite technology, in this classic PROTEOR foot design. The SSU provides both vertical shock absorption and transverse rotation giving active K3/K4 users a more natural and comfortable experience everyday. This foot is beneficial for both transtibial and transfemoral users, providing great results when used in combination with a microprocessor knee.

Water-resistant\*

\*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

## Features and Benefits

- Spherical Shock Unit (SSU) provides ultimate vertical shock absorption at heel strike and also a transverse rotation of +/-15 degrees easing stress and pressure on the residual limb
- J-shaped keel spring offers optimum compliance and tibial progression in combination with efficient energy return
- Delivers superior mediolateral range of movement improving stability, comfort, and confidence on various terrains
- EnduraCore® technology balances strength, flexibility, and energy return to enhance durability without compromising function

Low maintenance design

Spherical Shock Unit (SSU)

Sandal toe option available

# HOPPER

The HOPPER running blade was designed with the planet in mind, constructed with repurposed carbon fibre from the aeronautical industry. With a broad base for stability, this blade meets the demands of high impact activity while offering a compliant response improving comfort. The proximal 4-hole adapter makes fitting simple, and the sole grip is easily replaced.

Available in two blade heights, and a variety of categories, this foot is accessible to experienced athletes, brave beginner's, and a variety of age groups; all of whom can benefit from an effective running blade whilst keeping the impact on our environment in mind.

## Features and Benefits

- Constructed using repurposed carbon waste from the aeronautical industry
- Efficient energy return integrated with forgiving compliance
- Broad base of support
- Established Salomon outsole that is easily replaced
- Available in two blade sizes: Audacieuse (Standard >24cm Build height) and Intrepide (Short >19cm build height)
- Accommodates patient weight up to 110kg

Comfortable outsole

Universal adapter for easy adjustment

# RUSH HiPro®

The RUSH HiPro foot provides a realistic and responsive foot and ankle motion. Virtually indestructible, the HiPro is made from an advanced engineered fibreglass composite which is three times more flexible than most conventional prosthetic feet. The energy return of this foot enables users to easily traverse the most aggressive terrain whilst experiencing no “dead spots”, and the smooth roll-over makes it suitable for a range of K3-K4 activities, from walking and golfing to sprinting and basketball.

Waterproof\*

**\*Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Highly dynamic and durable with a smooth roll-over
- Built for all-terrain
- Highly resistant Elastomer bumper providing progressive shock absorption
- High-tech rubber adhesive contributes to the flexibility of this foot
- Fresh and salt waterproof\*
- Accommodates patient weight up to 166kg
- Available in H2O (page 38) and EVAQ8 (page 40)

Available in regular or sandal toe

# RUSH RAMPAGE LP®

Thanks to the unique sole plate and durable glass composite, the RAMPAGE LP delivers a smooth transition from heel strike to toe-off. The low-profile and cosmesis-friendly design of the RUSH RAMPAGE LP makes it a great option for users with limited clearance whilst seeking the ultimate blend of comfort, performance, and durability. Similar to other feet in the RUSH range, the RAMPAGE LP features a high degree of flexibility, exceptional energy return, and zero “dead spots” meaning users participating in K3-K4 activities can do so comfortably.

Waterproof\*

\*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

# RUSH ROGUE® 2

The RUSH ROGUE 2 provides a realistic and dynamic foot and ankle motion. With vertical shock and torsion, this foot provides comfortable relief from high-impact loading allowing the user to push the foot to the limits. The components are made of advanced fibreglass composite which is three times more flexible than most conventional prosthetic feet. The roll-through characteristics of the foot provide exceptional energy return with no “dead spots” for users on the court or aggressive terrain.

Waterproof\*

\*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Vertical loading pylon for vertical shock relief and impact absorption
- Smooth roll through for high energy return and comfort in any situation
- Biomimetic ankle action to simulate the human foot
- Extreme reliability for extended use in high impact applications
- Fresh and salt waterproof\*
- Rotational torsion relief to ease the impact to knee, hip, and back (± 15°)
- Available in H2O (page 38) and EVAQ8 (page 40)

## Ordering Information

Trial Period - This foot has a 30 day trial period.

### Impact Level Descriptions

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

**High:** Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

# RUSH H2O Collection

The RUSH H2O collection features ideal feet for a shower leg or various, non-invasive water sport activities. Available in the tried-and-true RUSH HiPro, RAMPAGE, RAMPAGE LP and ROGUE models and featuring an integrated Vibram® sole and custom moulded rubber toe wrap for a strong grip.

The RUSH H2O collection of feet offer the same durability and comfort as all other RUSH feet, with the addition of superior traction on slick surfaces. From the shower to the pool, these feet provide grip and added confidence required on slippery surfaces.

Waterproof\*

\***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Integrated Vibram® sole and custom moulded rubber toe wrap for a strong grip
- Fresh and salt waterproof\*
- Ideal for non-invasive water sports such as kayaking and surfing, and barefoot activities such as karate and yoga
- Function consistent with established RUSH foot models, providing users with more familiar support and response

Integrated Vibram® sole

Waterproof in fresh and salt water

## Ordering Information

# RUSH EVAQ8

The RUSH Foot EVAQ8 Collection provides maximum vacuum efficiency in just a few quick steps. Available in the HiPro, ROGUE 2, RAMPAGE and RAMPAGE LP models providing the perfect solution for the majority of individuals seeking integrated effective vacuum suspension. Upwards of 22inHg can be achieved with this simple, integrated design that stabilises volume, increases suspension, and heightens proprioception through elevated vacuum. No batteries or complicated mechanical pumps are required.

Waterproof\*

\*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Simple, integrated design free of bulky components
- Stabilises volume, increases linkage, and heightens proprioception through elevated vacuum
- Built for all-terrain
- Fresh and salt waterproof\*
- Requires minimal maintenance
- The RUSH FOOT EVAQ8 Collection is available in the HiPro, ROGUE 2, RAMPAGE and RAMPAGE LP models

For high impact activities

Optional sandal toe

# RUSH Chopart®

The RUSH Chopart foot is specifically designed for people with Chopart amputations as well as Lisfranc, Pirogoff, Boyd and partial foot prostheses. This prosthetic foot features a dynamic design, providing increased reliability and eliminating the breakage commonly seen with carbon Chopart plates. The unique fibreglass composite used in its construction has been engineered for optimal flexibility and durability.

Waterproof\*

\***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

## Features and Benefits

- Highly dynamic
- Durable
- Smooth roll-over
- Waterproof in fresh and salt water
- Accommodates patient weight up to 166kg
- Optional foot shell available

## Ordering Information

Trial Period - There is no trial on this product.

### Impact Level Descriptions

**Moderate:** Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

**High:** Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

# DynaStep

Aided by the shape of its carbon keel, the DynaStep ensures an efficient energy return and comfort whilst providing the patient with dynamics suitable for low/moderate activity users. The split keel design allows inversion and eversion whilst navigating uneven terrain. When combined with the Multiaxis Ankle, plantarflexion, dorsiflexion, inversion, and eversion levels increase even further.

## Features and Benefits

- Appropriate for transtibial and transfemoral patients
- Foam of the foot is moulded on the carbon keel
- Comes with its malleolar clip to help the set up of the foot shell

Multiaxis Ankle

Split toe design

## Ordering Information

Trial Period - This foot has a 30 day trial period.

### Impact Level Descriptions

# S.A.C.H

The S.A.C.H foot (Solid Ankle, Cushion Heel) is ideal for users performing low impact activities. The three varying heel inserts provide shock absorption at the heel strike and step completion is ensured by the flexible forefoot. Whilst a medium heel insert is provided as standard with the men's and women's feet, softer or harder inserts can be ordered to increase and decrease shock absorption as needed.

## Features and Benefits

- 3 different heel inserts (soft, medium and hard)
- Accommodates patient weight up to 125kg (N1A111)
- Available in men's, women's, and paediatric sizes
- Variety of possible proximal connections including Multiaxial Ankle, Pyramid, or Wooden Block.

## Ordering Information

Trial Period - This foot has a 30 day trial period.

### Impact Level Descriptions

**Low:** Daily activities include mostly level ground walking, moving around in the home and the community.
