

Myoelectric Hands Myo Select

Steeper Myoelectric Hands Myo Select

The Select range of myoelectric hands are electrically operated devices designed to meet the needs of most upper limb amputees. This range offers durability, reliability and quality design features. With a powerful mechanism and a grip force output suitable for most routine daily tasks provided to the user.

With on-board microprocessor technology, our myoelectric hands offer maximum flexibility. Innovative, built-in electronics provide a choice of nine control modes for the hand, selected using the dial switch feature. The on-board system also includes an electronic 'gear change' allowing power to be stored and released on demand.

Features

- Controlled with myoelectrodes or switch inputs
- Electronics equipped with patented Powerforce™ technology
- Supercapacitor technology (sizes 7½ - 8½) provides efficient control and power conservation
- Nine control modules
- · Electronic 'gear change'
- 2 wrist options available; Quick Disconnect Wrist and Friction Wrist
- 2 thread options available; North American Thread (1/2 x 20 TPI) and European Thread (M12 x 1.5mm)

The Myo Select myoelectric hand offers durability, reliability and quality design features.

The Steeper myoelectric hand with hand shell (pictured). is compatible with our full range of Elegance gloves, providing full hand function with excellent cosmetic properties. Our range of full-length, long-mould PVC and silicone gloves are designed exclusively for the rigours of functional activity associated with a myoelectric hand.

For further information on compatible components and gloves please refer to the Steeper Upper Limb Catalogue.

Powering the Myo Select

Powering the Myo Select is easy thanks to Steeper's new S-Charge System, which employs the very latest advances in battery technology.

The S-Charge System is a user friendly, flexible, internal battery system with an OLED display and a magnetic charger, which is fitted into a prosthetic forearm. The S-Charge System allows the user to easily activate, deactivate and charge their myoelectric hand, all whilst confidently monitoring the power status during use through the display of realtime battery life icons.

Quick Disconnect Wrist

Friction Wrist

(½" x 20TPI)

For further wrist options please refer to the Steeper Upper Limb Catalogue.

Myo Select Part Numbers

Please refer to the Steeper Upper Limb Catalogue for additional components, hand shell and Elegance gloves. To order please contact customerservices@steepergroup.com.
