Two-tone finish PVC glove

Across knuckle dimension  
indication of UK sizing method

### Cosmetic Gloves (for passive hands)

We manufacture a wide range of cosmetic gloves in both PVC and silicone, designed to suit Steeper hands as well as hands from other manufacturers.

Both PVC and silicone gloves are available in Standard or TrueFinish™ shades. TrueFinish™ features micropigmentation for a more lifelike appearance, available in 19 colours (E0 - E18).

Our glove range is detailed over the following pages with reference made to the glove number e.g. 302.

To select the correct glove apply a prefix to the number as follows:

- CG - Standard PVC
  - TG - TrueFinish™ PVC
  - SG - Standard Silicone
  - TSG - TrueFinish™ Silicone
- e.g: TSG302/E4 - TrueFinish™ Silicone Glove 7 ¾" Left, Colour E4

Please refer to page 9 for cosmetic glove colour options.

### Elegance and Elegance Plus Gloves (for myoelectric and functional hands)

The Elegance range is available in both PVC and silicone, and in 19 TrueFinish shades and have been designed to work with myoelectric hands, Steeper cable and spring operated hands, as well as myoelectric and functional hands from other manufacturers. The Elegance Plus silicone glove has been specifically designed to fit the Myo Kinisi. Crafted using multiple layers of advanced silicone material and constructed with an integrated, reinforced inner mesh layer these gloves are highly resistant and are especially suitable for higher activity patients. The addition of an easy-glide coating allows for clothing to be donned or doffed easily and the additional detailing on the knuckles, palms, and nail finish provides increased realism.

### Two-Tone Finish Gloves

Our two-tone finish gloves are available in Standard (CG) or TrueFinish™ (TG) PVC. Please select the palmar colour (lighter and always allocated to the palm) and then the secondary dorsal colour. The dorsal colour is then applied to the glove to complete the two-tone appearance. Please use the glove ordering chart where this is required and discuss your requirements with your local supplier.

**Note:** please refer to page 9 for cosmetic glove colour options.

### Partial Hand Gloves

Several popular glove sizes are also available with a wider wrist and are recognisable by the identifier PH.

e.g: TG3PH - TrueFinish™ PVC, 3 ¼" Left Wide Wrist

These can be used for partial hand patients who require a cosmetic replacement. The wider wrist allows the residual limb to fit inside the glove and the remaining void can be filled with a soft filler.

For partial hand patients where the residual limb will not fit inside the glove, a zip may be fitted to CG and TG gloves. Please use the glove ordering chart where this is required and discuss your requirements with your local supplier.

Please refer to the following page for cosmetic glove colour options.
